Focusing on indie rock Arcade Fire the Shins hiphop Public Enemy Jay Z electronic Daft Punk Boards of Canada pop Madonna Justin Timberlake metal Metallica Boris and experimental underground music Suicide Boredoms it features all new essays and reviews written with the sharp wit and insight for which the site is known. Kicking it off in 1977 with the birth of punk and independent music The Pitchfork 500 runs chronologically with each chapter representing a distinct period and offering a narrative of how the musical landscape of the day influenced its artists. The book opens with David Bowie Lou Reed Iggy Pop Kraftwerk and Brian Eno the art rock godfathers who set the tone and tenor for the next thirty years and wraps up in the present when bands connect with new audiences through social networking sites and prime time TV placements and when a single mp3 can turn a niche indie artist into a global sensation. Sidebars like Yacht Rock Runaway Trainwrecks Nanofads and Career Killers call out some far from classic musical trends and identify the guiltiest offenders. Modernizing the music guide format The Pitchfork 500 reflects the way listeners are increasingly processing music by song rather than by album. These 500 tracks condense thirty years of essential music into the ultimate chronological playlist each song advancing the narrative and by extension the music itself.

**Platforms, Promotion, and Product Discovery** Luis Aguiar (Research fellow), Joel Waldfogel, 2018. Digitization has vastly increased the amount of new music produced and available directly to consumers. While this has levelled the playing field between already prominent and new artists, creators may now be dependent on platform decisions about which songs and artist to promote. With Spotify emerging as a major interactive streaming platform this paper explores the effect of Spotify's playlists on both the promotion of songs and the discovery of music by new artists using four approaches. First we examine songs streaming volumes before and after their addition to and removal from major global playlists. Second we compare streaming volumes for songs just on and just off algorithmic top 50 playlists. Third we make use of cross country differences in inclusion on New Music Friday lists using song fixed effects to explain differences in streaming. Fourth we develop an instrumental variables approach to explaining cross country New Music Friday rank differentials based on home bias. Being added to Today's Top Hits a list with 18.5 million followers during the sample period raises streams by almost 20 million and is worth between 116 000 and 163 000. Inclusion on New Music Friday lists substantially raises the probability of song success including for new artists. [Spotify Music Marketing Rescue, 2020](#)
