The Cult of Statistical Significance Deirdre Nansen McCloskey, Steve Ziliak, 2010-02-11 McCloskey and Ziliak have been pushing this very elementary very correct very important argument through several articles over several years and for reasons I cannot fathom it is still resisted If it takes a book to get it across I hope this book will do it It ought to Thomas Schelling Distinguished University Professor School of Public Policy University of Maryland and 2005 Nobel Prize Laureate in Economics With humor insight piercing logic and a nod to history Ziliak and McCloskey show how economists and other scientists suffer from a mass delusion about statistical analysis The quest for statistical significance that pervades science today is a deeply flawed substitute for thoughtful analysis Yet few participants in the scientific bureaucracy have been willing to admit what Ziliak and McCloskey make clear the emperor has no clothes Kenneth Rothman Professor of Epidemiology Boston University School of Health The Cult of Statistical Significance shows field by field how statistical significance a technique that dominates many sciences has been a huge mistake The authors find that researchers in a broad spectrum of fields from agronomy to zoology employ testing that doesn't test and estimating that doesn't estimate The facts will startle the outside reader how could a group of brilliant scientists wander so far from scientific magnitudes This study will encourage scientists who want to know how to get the statistical sciences back on track and fulfill their quantitative promise The book shows for the first time how wide the disaster is and how bad for science and it traces the problem to its historical sociological and philosophical roots Stephen T Ziliak is the author or editor of many articles and two books He currently lives in Chicago where he is Professor of Economics at Roosevelt University Deirdre N McCloskey Distinguished Professor of Economics History English and Communication at the University of Illinois at Chicago is the author of twenty books and three hundred scholarly articles She has held Guggenheim and National Humanities Fellowships She is best known for *How to Be Human Though an Economist* University of Michigan Press 2000 and her most recent book *The Bourgeois Virtues Ethics for an Age of Commerce* 2006

Spinoza's Argument for Substance Monism Christopher Martin, 2023-11-13 In Spinoza's Argument for Substance Monism Why There Is Only One Thing Christopher Martin provides an interpretation and defense of this argument using speculative metaphysics as a method to show how the key terms and concepts are employed and fit together Specifically Martin argues that i Spinoza's understanding of substance and attribute departs only slightly from dominant historic notions ii his definition of God in terms of attributes instead of perfections is quite helpful and mostly compatible with more traditional definitions and iii Spinoza's pairing of causal and conceptual relations is more intuitive than we think Martin also shows how these essences function as causes and explains why with Spinoza's understanding of emanation and conceptual independence any substance must have every attribute These features of Spinoza's argument explain and defend his ultimate claim that God Nature is the only substantial being in existence This book demonstrates how approachable and compelling Spinoza's argument is and illustrates the practice and potential of speculative metaphysics for specialists and non specialists alike

WineSpeak Bernard Klem, 2009-07-01 If you read wine reviews you're already either amused or confused by the soaring language wine writers often use to describe what they're smelling and tasting But do you always know what they mean Have you ever sipped a complex white and sensed what's so colorfully described as a peacock's tail Have you ever savored a full bodied red only to detect the ripe acrid smell of a horse stall If not you're in for a treat because these terms and thousands more are all here to amuse dismay enlighten inspire puzzle and utterly shock you Welcome to the rich linguistic universe of wine speak a world where words and wine intersect in an uncontrolled riot of language guaranteed to keep you entertained for hours The author a lifelong lover of both wine and words has compiled and organized this unique thesaurus of 36 975 wine tasting descriptors into 20 special collections extracted from 27 categories so you can locate exactly the right term or phrase to express yourself clearly or to understand others May your path across the galaxy of wine be paved only with labels from the very best bottles on earth Or much more cautiously with wines that could introduce you to angel pee citronella eastern European fruit soup Godzilla iodine ladies underwear mustard gas old running shoes rawhide hot tar roads bubblegum sweaty saddles crushed ants kitchen drains or even turpentine
