Open Distributed Processing, II Jan de Meer, Bernd Mahr, Silke Storp, 1994 Concentrates on informatics in medicine covering topics such as trader trading distributed systems quality of multimedia services distributed applications and Open Distributed Processing design and modelling concepts **Open Distributed Processing** K. Raymond, L.

Armstrong, 1995-07-31 Open Distributed Processing contains the selected proceedings of the Third International Conference on Open Distributed Systems organized by the International Federation for Information Processing and held in Brisbane Australia in February 1995 The book deals with the interconnectivity problems that advanced computer networking raises providing those working in the area with the most recent research including security and management issues Logic And Software Engineering - Proceedings Of The International Workshop In Honor Of Chih-sung Tang Amir Pnueli, H

Lin, 1996-10-25 This workshop brought together top researchers in logic and software engineering in the unique occasion of celebrating the 70th birthday of Professor C S Tang who has devoted much of his long research career to establishing a solid logic foundation for software engineering **Advances in Database Systems** J. Paredaens, L. Tenenbaum, 2014-05-04

Advanced information technology is pervasive in any kind of human activity science business finance management and others and this is particularly true for database systems Both database theory and database applications constitute a very important part of the state of the art of computer science Meanwhile there is some discrepancy between different aspects of database activity Theoreticians are sometimes not much aware of the real needs of business and industry software specialists not always have the time or the opportunity to get acquainted with the most recent theoretical ideas and trends as well as with advanced prototypes arising from these ideas potential users often do not have the possibility of evaluating the theoretical foundations and the potential practical impact of different commercial products So the main goal of the course was to put together people involved in different aspects of database activity and to promote active exchange of ideas among them

Algebraic Foundations of Systems Specification Egidio Astesiano, Hans-Jörg Kreowski, Bernd Krieg-Brückner, 2012-12-06 The aim of software engineering is the provision and investigation of methods for the development of software systems of high quality with correctness as a key issue A system is called correct if it does what one wants if it meets the requirements To achieve and to guarantee correct systems the need of formal methods with rigorous semantics and the possibility of verification is widely accepted Algebraic specification is a software engineering approach of this perspective When Liskov and Zilles Guttag and the ADJ group with Goguen Thatcher Wagner and Wright introduced the basic ideas of algebraic specification in the mid seventies in the U S A and Canada they initiated a very successful and still flourishing new area In the late seventies algebraic specification became a major research topic also in many European countries Originally the algebraic framework was intended for the mathematical foundation of abstract data types and the formal development of first order applicative programs Meanwhile the range of applications has been extended to the precise specification of

complete software systems the uniform definition of syntax and semantics of programming languages and to the stepwise development of correct systems from the requirement definitions to the running programs The activities in the last 25 years have led to an abundance of concepts methods approaches theories languages and tools which are mathematically founded in universal algebra category theory and logic **Information Modelling and Knowledge Bases IV** Hannu
