Opening Eyes to Mathematics Debby Head, Libby Pollett, Michael J. Arcidiacono, 1991 **Guide to Math Materials** Phyllis J. Perry, 1997-02-15 Now it's easy to locate the materials you need to implement the new NCTM math standards. Organized by such math topics as problem solving, estimation, number sense and numeration and geometry and spatial relationships, this book shows users where to find manipulatives and materials such as attribute blocks, pattern blocks, clocks, scales, multilink cubes and prisms, calculators and sorting toys. It also lists specialized math books, computer software and a host of other learning materials, e.g., activity cards, puzzles, posters, games, reproducibles. The author briefly describes each product, cites grade level when given and explains possible applications. Products of exceptional quality and value are highlighted and the addresses of publishers and suppliers are given. A real time saver. Grades K-4 *Books in Print*, 1991

Becoming Literate in Mathematics and Science, 2001 [The New Walford Guide to Reference Resources](#) Ray Lester, 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information, saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise, look no further. In addition to print sources, The New Walford naturally covers an extensive range of e-reference sources such as digital databanks, digital reference services, electronic journal collections, meta-search engines, networked information services, open archives, resource discovery services and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result, the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy to use and intuitive. Publisher **ENC Focus**, 2000 **Approaches and Strategies in Next Generation Science Learning** Khine, Myint Swe, 2013-01-31 Approaches and Strategies in Next Generation Science Learning examines the challenges involved in the development of modern curriculum models, teaching strategies and assessments in science education in order to prepare future students in the 21st century economies. This comprehensive collection of research brings together science educators, researchers and administrators interested in enhancing the teaching and learning of next generation science [STEM Education: Concepts, Methodologies, Tools, and Applications](#) Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science, Technology, Engineering and Mathematics curricula at all educational levels.
