Forging of a Legend Chris Ward,Andy Lee,Andreas Wachtel,2009-07-19 617 Squadron of 5 Group RAF Bomber Command was without doubt the most famous RAF Squadron in World War II It was formed to carry out the precision low level attack on the Mohne Eder and Sorpe Dams using Barnes Wallaces newly developed rotating mine now commonly referred to as The Bouncing Bomb The raid was a tremendous success although at great cost to the squadron and proved to be a great moral booster for the war weary British public Guy Gibson VC was tasked with organizing the formation and training of the new squadron and the Dambusters have been national heroes ever since Although several books have previously been written on this epic adventure this is a new look at their first raid and then the long and envious history of 617 until the end of the war This new version of the Dams raid within the book pays particular attention to timings as it is easy to overlook the fact that this was a complex three phase operation spanning 8 hours and 47 minutes with action occurring simultaneously at widely dispersed locations It also attempts to settle finally the circumstances of the losses by examining the testimony of eyewitnesses on both sides and presenting arguments to help readers decide for themselves what actually happened where previous accounts are contradictory or at variance In the later war years 617 suffered greatly during an attack on the Dortmund Ems Canal but recovered and their list of priority special targets then included the German missile research plant at Peenemunde Hamburg the U boat pens at La Pallice and the sinking of the battleship Tirpitz The legendary Leonard Cheshire VC led the Squadron for much of that period This newly researched account of 617s wartime record contains many first hand accounts from squadron members and also German and Dutch witnesses who were present at some of the most spectacular raids and have explained many of the mysterious losses of the Squadrons aircraft Lengthy appendices contain a Roll of Honour Commanders Airfields and aircraft Operational statistics and Aircraft Histories *Breaking the German*

destruction of the Mohne and Eder dams in north west Germany by the RAF's 617 Squadron on the night of 16/17 May 1943 was an epic that has passed into Britain's national legend. Max Hastings grew up embracing the story, the classic 1955 movie and the memory of Guy Gibson, the 24-year-old wing commander who led the raid. In the 21st Century, however, he urges that we should see the dambusters in much more complex shades. The aircrew's heroism was entirely real, as was the brilliance of Barnes Wallis, inventor of the bouncing bombs. But commanders who promised their young fliers that success could shorten the war fantasised as ruthlessly as they did about the entire bomber offensive. Some 1,400 civilians perished in the biblical floods that swept through the Mohne valley; more than half of them Russian and Polish women slave labourers. Hastings vividly describes the evolution of Wallis's bomb and of the squadron which broke the dams. But he also portrays in harrowing detail those swept away by the torrents. He argues that what modern Germans call the Mohnekatastrophe imposed on the Nazi war machine temporary disruption rather than a crippling blow. Ironically, Air Marshal Sir Arthur Bomber Harris gained much of the public credit, though he bitterly opposed Chastise as a distraction from his city-burning blitz. Harris also made perhaps the operation's biggest mistake: failure to launch a conventional attack on the huge post-raid repair operation, which could have transformed the impact of the dam breaches on Ruhr industry. Here, once again, is a dramatic retake on familiar history by a master of the art. Hastings sets the Dams Raid in the big picture of the bomber offensive and of the Second World War, with moving portraits of the young airmen, so many of whom died. Of Barnes Wallis, the monstrous Harris, the tragic Guy Gibson, together with superb narrative of the action of one of the most extraordinary episodes in British history.

Operation Chastise Max Hastings, 2020-02-18 Best Nonfiction of 2020 Kirkus Reviews

One of the most lauded historians of our time returns to the Second World War in this magnificent retelling of the awe-inspiring raid on German dams conducted by the Royal Air Force's 617 Squadron. The attack on Nazi Germany's dams on May 17, 1943, was one of the most remarkable feats in military history. The absurdly young men of the Royal Air Force's 617 Squadron set forth in cold blood and darkness without benefit of electronic aids to fly lumbering heavy bombers straight and level towards a target at a height above the water less than the length of a bowling alley. Yet this story and the later wartime experience of the 617 Squadron has never been told in full. Max Hastings takes us back to the May 1943 raid to reveal how the truth of that night is considerably different from the popularized account most people know. The RAF had identified the Ruhr dams as strategic objectives as far back as 1938. In those five years, Wing Commander Guy Gibson formed and trained the 617 Squadron. Hastings observes that while the dropping of Wallis's mines provided the dramatic climax, only two of the eight aircraft lost came down over the dams; the rest were shot down on the flight to or back from the mission. And while the 617 Squadron's valor is indisputable, the ultimate industrial damage caused by the dam raid was actually rather modest. In 1943, these brave men caught the imagination of the world and uplifted the weary spirits of the British people. Their achievement unnerved the Nazi high command and caused them to expend large resources on dam defenses, making the mission a success. An example of

Churchill's military theatre at its best what 617 Squadron did was an extraordinary and heroic achievement and a triumph of British ingenuity and technology a story to be told for generations to come Operation Chastise includes three 8 page black and white photo inserts and 6 maps **The Dambuster Who Cracked the Dam** Arthur G. 17th May 1943 brought catastrophic damage to the three dams that served the Ruhr Valley Water and electricity supplies were disrupted in a key area of the manufacture of Germany's war munitions and the consequences were disastrous. The German war effort was set back substantially, the Allies celebrated, and Dr Barnes Wallis became a national hero as the designer of the famed bouncing bomb that inflicted such damage. Considered from an Allied perspective, the Dambuster Raid was a triumphant success, not only of British engineering but also of pilot endeavour. View it from the German perspective, however, and an entirely new story emerges. That is precisely what we have here. In this image-heavy publication, Helmuth Euler explores all facets of the operation in fascinating detail, offering a host of illuminating insights into this much-studied event of twentieth-century history.

[The Complete Dambusters](#) Charles Foster, 2018-05-08. On 16 May 1943, nineteen Lancaster aircraft from the RAF's 617 Squadron set off to attack the great dams in the industrial heart of Germany. Flying at a height of 60ft, they dropped a series of bombs which bounced across the water and destroyed two of their targets, thereby creating a legend. The one-off operation combined an audacious method of attack, technically brilliant flying, and visually spectacular results. But while the story of Operation Chastise is well known, most of the 133 Dambusters who took part in the Dams Raid have until now been just names on a list. They came from all parts of the UK and the Commonwealth and beyond, and each of them was someone's son or brother, someone's husband or father. This is the first book to present their individual stories and celebrate their skill, heroism, and for many, sacrifice.

[Dam Busters](#) Ted Barris, 2018-09-11. National Bestseller. Foreword by Peter Mansbridge. Barris tells the jaw-dropping story of a night that changed the war. The *Globe and Mail*: "It was a night that changed the Second World War. The secret air raid against the hydroelectric dams of Germany's Ruhr River took years to plan, involved an untried bomb, and included the best aircrewmembers the RAF Bomber Command could muster, many of them Canadian. The attack marked the first time the Allies tactically took the war inside Nazi Germany. It was a military operation that became legendary. On May 16, 1943, nineteen Lancaster bombers carrying 133 airmen took off on a night sortie, code-named Operation Chastise. Hand-picked and specially trained, the Lancaster crews flew at treetop level to the industrial heartland of the Third Reich and their targets: the Ruhr River dams whose massive water reservoirs powered Nazi Germany's military industrial complex. Each Lancaster carried an explosive which, when released just sixty feet over the reservoirs, bounced like a skipping stone to the dam, sank, and exploded. The raiders breached two dams and damaged a third. The resulting torrent devastated enemy power plants, factories, and infrastructure a hundred miles downstream. Every airman on the raid understood that the odds of survival were low. Of the nineteen outbound bombers, eight did not return. Operation Chastise cost the lives of fifty-three airmen, including fourteen Canadians. Of the sixteen RCAF men who survived, seven received military decorations. Based on interviews, personal accounts, flight logs, maps, and photographs of the Canadians involved, *Dam Busters* recounts the dramatic story of these young Commonwealth bomber crews tasked with a high-risk mission against an enemy prepared to defend the Fatherland to the death."
