Operation Iraqi Freedom:

Shaping the Plan for Operation Iraqi Freedom Gregory Hooker, 2005 The aftermath of the war in Iraq has generated a great deal of second guessing regarding Washington's prewar planning and intelligence efforts Gregory Hooker senior intelligence analyst for Iraq at U S Central Command provides a detailed narrative of the war planning process beginning with the military's initial attempts to adjust to the new focus on regime change and closing with the government's ineffective preparation for the postwar environment

Operation Iraqi Freedom Catherine Dale, 2011-04 Operation Iraqi Freedom OIF the U S led coalition military operation in Iraq was launched on March 20 2003 with the goal of removing Saddam Hussein's regime and destroying its ability to use weapons of mass destruction The focus of OIF has shifted from regime removal to helping the Gov't of Iraq improve security establish a system of governance and foster economic development This report addresses these policy issues Identifying how U S national interests and strategic objectives in Iraq and the region should guide further U S engagement Monitoring and evaluating the impact of the changes in the U S presence and role in Iraq and Laying the groundwork for a traditional bilateral relationship Map A print on demand report

Operation Iraqi Freedom Thomas Donnelly, 2004 This study argues that the George W Bush administration charted the correct strategy in Iraq but has failed to match its military means to its strategic ends

U.S. Military Operations in Iraq Kate Phillips, 2006 A colloquium on U S Military Operations in Iraq Planning Combat and Occupation was held November 2 2005 and was co sponsored by SSI and Johns Hopkins School of Advanced International Studies SAIS Three years beyond the start of that transition the debate continues about the adequacy of planning for and proficiency of execution of Phase IV operations in Iraq and elsewhere The debate most often surrounds three issues concerning this final operational phase the relationship to preceding operational phases responsibility for planning and responsibility for execution Much of the debate to this point has been an unproductive effort to assign blame for shortcomings in the planning for and execution of stability and reconstruction operations participants in the colloquium moved beyond finding fault began analyzing the central issues and addressed solutions

Decision Making in Operation Iraqi Freedom Steven Metz, 2010 One of the defining characteristics of strategy making in the Bush administration was the treatment of any decision involving transnational terrorism as a crisis with a limited slate of participants and a minimal role for professional expertise except on operational and technical considerations When the administration broke from its predecessors and chose to approach the Iraq issue as part of the war on terrorism rather than as simply an element of

regional stability it shifted to a crisis decision mode This was unusual since the Iraq conflict did not meet the usual requirements for a crisis a very high threat and limited decision time This initial volume provides a review of decisions made by senior military and civilian leaders during the several years thus far of the war in Iraq and focuses on the how and why certain decisions were made Allied Participation in Operation Iraqi Freedom Stephen A. Carney, 2011 Allied Participation in Operation Iraqi Freedom highlights a number of key aspects of allied support to the U S led operation The presence of ground forces from so many coalition partners allowed U S combat forces to focus their generally superior capabilities in more contested sections of the country This division of labor served American ends while still ensuring that our partners performed vital work that fully justified their commitment to Iraq s security These combined operations also strengthened the ties between countries and improved the quality of interoperability between U S and coalition troops Allied support played an important role in stabilizing the situation in Iraq This short study also underscores the significant challenges that U S Army planners faced in Iraqi Freedom in integrating a host of different military partners into U S operational plans Similar issues of working together in a complex military environment will doubtless reoccur in future operations but the benefits of assembling such coalitions will almost certainly outweigh the problems The United States cannot fight alone in the current operational environment and improving the quantity and quality of our interaction with our international partners should continue to be a high priority I commend this monograph to today s Army to read gain insight into such combined operations and reflect on how much support our allies can provide in future military endeavors Richard W Stewart Chief Historian 30 September 2011 **Operation Iraqi Freedom** Catherine Marie Dale, Library of Congress. Boyne, 2003-11-15 From the New York Times bestselling author of *Weapons of Desert Storm* comes Walter J Boyne's *Operation Iraqi Freedom* No war has ever had the intensive media coverage of the 2003 war in Iraq and none has ever had such monumental second guessing Months before the war began domestic and international pundits painted a gloomy picture of a new Vietnam or of a nuclear Armageddon that would see Israel reduced to ruins The war started with a brilliant series of pre emptive bangs that shattered Iraqi leadership and seized the most valuable areas of Iraq How did the US military machine assumed to have insufficient air power too few troops and little momentum take a country the size of California within three weeks In the 1991 victory in the Gulf War the United States led a much larger coalition force into a heavy air campaign followed by a lightening quick ground campaign In the years that followed the United States military experienced a continuing series of reductions in the national defense budget What was left unrecorded was the incredible degree of competence with which the US military leadership managed the reduction in resources balancing force structures against personnel requirements against procurement needs and logistic realities Any one considering the great military victory achieved in Iraq must ask the following questions Who was bright enough to plan to have the weapons systems in the right place at the right time Who orchestrated this vast complex array of sophisticated military machinery ships submarines missiles armor and soldiers all needing fuel ammunition and water The answer is the much maligned civil and military leaders of the American defense establishment working in concert with the most advanced defense based corporations in the world While there were those anxious to parade the iniquities of a two billion dollar bomber most often failed to appreciate the genius required to conceive of much less create a system which can use a satellite to send signals to a B 1B to program a precision guided missile to take out a Soviet T 72 tank parked in a mosque without damaging the mosque Admittedly there were lapses in the Iraqi war such as the looting of museums by members of the Ba ath party just a day after many had declared Baghdad liberated and the raids on hospitals another problem that could have easily been remedied by a show of U S presence and force And there were technological complications as well including the aching misfortune of death by friendly fire The author deals with these shortcomings in a straightforward manner *Operation Iraqi Freedom What Went Right and*

Why What Went Wrong and Why gives intimate insight into the way in which the armed services particularly the United States Air Force managed to overcome genuine budgetary political and military difficulties to create the finest military force in the world one that operated with the most extreme care to avoid collateral damage and to prevent loss of life At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied

Operation Iraqi Freedom William M. Solis,2010-08 The drawdown from Iraq is a complex operation of significant magnitude Established drawdown timelines dictate a reduction in forces to 50 000 troops by August 31 2010 and a complete withdrawal of U S forces from Iraq by December 31 2011 While the Dept of Defense DoD has made progress toward meeting these goals a large amount of equipment personnel and bases remain to be drawn down Moreover escalating U S involvement in Afghanistan may increase the pressure on DoD to efficiently execute the drawdown This report examined 1 the extent to which DoD has planned for the drawdown from Iraq in accordance with set timelines and 2 factors that may impact the efficient execution of the drawdown Includes recomm illus
