*UML'99 - The Unified Modeling Language: Beyond the Standard* Robert B. France, Bernhard Rumpe, 2003-07-31 This book constitutes the refereed proceedings of the Second International Conference on the Unified Modeling Language UML 99 held in Fort Collins CO USA in September 1999 The 44 revised full papers presented together with two invited contributions and three panel summaries were carefully reviewed and selected from a total of 166 submissions The papers are organized in topical sections on software architecture UML and other notations formalizing interactions meta modeling tools components UML extension mechanisms process modeling real time systems constraint languages analyzing UML models precise behavioral modeling applying UML sequence design and coding *New Modeling Concepts for Today's Software Processes* Jürgen Münch, Ye Yang, Wilhelm Schäfer, 2010-06-20 2010 was the first time that the International Conference on Software Process was held autonomously and not co located with a larger conference This was a special challenge and we are glad that the conference gained a lot of attention a significant number of contributions and many highly interested participants from industry and academia This volume contains the papers presented at ICSP 2010 held in Paderborn G many during July 8 9 2010 ICSP 2010 was the fourth conference of the ICSP series The conference provided a forum for researchers and industrial practitioners to change new research results experiences and findings in the area of software and system process modeling and management The increasing distribution of development activities new development paradigms such as cloud computing new classes of systems such as cyber physical systems and short technology cycles are currently driving forces for the software domain They require appropriate answers with respect to process models and management suitable modeling concepts and an understanding of the effects of the processes in specific environments and domains Many papers in the proceedings address these issues **Review of the American Standard Specifications, Test Pieces, and Methods of Testing Iron and Steel, Adopted by Committee No. 1 of American Section of the International Association for Testing Materials** Albert Ladd Colby, 1900 **Formal and Natural Computing** Wilfried Brauer, Hartmut Ehrig, Juhani Karhumäki, Arto K. Salomaa, 2003-08-01 This book presents state of the art research in theoretical computer science and related elds In particular the following areas are discussed automata theory formal languages and combinatorics of words graph transformations Petri nets concurrency as well as natural and molecular computing The articles are written by leading researchers in these areas The writers were originally invited to contribute to this book but then the normal refereeing procedure was applied as well All of the articles deal with some issue that has been under vigorous study during recent years Still the topics range from very classical ones to issues raised only two or three years ago Both survey articles and papers attacking speci c research problems are included The book highlights some key issues of theoretical computer science as they seem to us now at the beginning of the new millennium Being a comprehensive overview of some of the most active current research in theoretical computer science it should be of de nite interest for all

researchers in the areas covered The topics range from basic decidability and the notion of information to graph grammars and graph transformations and from trees and traces to aqueous algorithms DNA encoding and self assembly Special effort has been given to lucid presentation Therefore the book should be of interest also for advanced students
