**Practices** Kris M. Y. Law, Kong Bieng Chuah, 2015-06-03 Presenting an innovative concept and approach for organization management this book serves to document an organization's journey towards the ultimate goal of learning organization. This book also shares the experience on how a OL framework built on established learning theories could be used effectively overcoming many of the barriers in a real industrial setting. Utilizing a ready to use tool called Project Action Learning PAL to analyze real life case studies the authors introduce a framework that allows teams of people to work and learn over the course of business projects. Equal emphasis is placed on the achievement of pre set project outcomes and the learning objectives of the participants. In addition a long term organizational learning strategy is put forward and the necessary supporting infrastructure in the form of four PAL Pillars is described. The concepts and development of the PAL driven Organizational Learning model are inspired by and grounded in Western and Eastern business philosophies and case studies which offer important insights into the management of organizations who are keen to develop sustainable business practices.

**The Importance of Organizational Learning in Change Processes** Bastian Krawinkel, 2008-12 Seminar paper from the year 2008 in the subject Business economics Personnel and Organisation grade 1.1 European Business School International University Schlo Reichartshausen Oestrich Winkel 16 entries in the bibliography language English abstract During the last decades the marketplace for organizations developed gradually from a push market into a pull market. In contrast to the environment years before where demand was high and supply scarce today's situation is characterized by an overflow of products whose amount is more than huge enough to satisfy the demand. The resulting customer expectations as well as the intense international competition depict an immense challenge for the flexibility of an organization which is operating in this environment. As a consequence of the evolved threats organizations are forced to adjust quickly and appropriately to new circumstances in order to remain competitive. Alas 2007 Appelbaum St Pierre Glavas 1998 p 43 Recently the perception of the term organization changed towards the definition given by the new system theory which was mainly proposed by Luhmann 2000. While previous definitions focused on an organization as being the sum of its single parts the new system theory perceives it as the manifestation of the communication between its members. In this context Simon 2007 points out that as any other system an organization primarily aims at securing its survival. As an organization is constituted by the communication between its members it has to remain competitive in order to keep the ability to pay its employees without whom communication would not take place. Only if this fundamental need is secured the focus can shift to concerns going beyond the prior goal of staying alive pp 32-33. Thus as already mentioned earlier it is crucial for an organization to adapt appropriately to changing circumstances. When doing so newly retrieved information has to be evaluated amongst
