Organizational Cognition and Learning: Building Systems for the Learning Organization Iandoli, Luca,Zollo, Giuseppe,2007-06-30 This book addresses the concept of organizing which is centered around collective learning and on the organization paradigm It presents a theory of organizational learning based on a model of memory explaining processes and dynamics through which memory is built and updated   **The Oxford Handbook of Organizational Decision Making** Gerard P. Hodgkinson,William H. Starbuck,2008 The Oxford Handbook of Decision Making comprehensively surveys theory and research on organizational decision making broadly conceived Emphasizing psychological perspectives while encompassing the insights of economics political science and sociology it provides coverage at theindividual group organizational and inter organizational levels of analysis In depth case studies illustrate the practical implications of the work surveyed Each chapter is authored by one or more leading scholars thus ensuring that this Handbook is an authoritative reference work for academics researchers advanced students and reflective practitioners concerned with decision making in the areas of Management Psychology and HRM Contributors Eric Abrahamson Julia Balogun Michael L Barnett Philippe Baumard Nicole Bourque Laure Cabantous Prithviraj Chattopadhyay Kevin Daniels Jerker Denrell Vinit M Desai Giovanni Dosi Roger L M Dunbar Stephen M Fiore Mark A Fuller Michael Shayne Gary Elizabeth George Jean Pascal Gond Paul Goodwin Terri L Griffith Mark P Healey Gerard P Hodgkinson Gerry Johnson Michael E Johnson Cramer Alfred Kieser Ann Langley Eleanor T Lewis Dan Lovallo Rebecca Lyons Peter M Madsen A John Maule John M Mezias Nigel Nicholson Gregory B Northcraft David Oliver Annie Pye Karlene H Roberts Jacques Rojot Michael A Rosen Isabelle Royer Eugene Sadler Smith Eduardo Salas Kristyn A Scott Zur Shapira Carolyne Smart Gerald F Smith Emma Soane Paul R Sparrow William H Starbuck Matt Statler Kathleen M Sutcliffe Michal Tamuz Teri JaneUrsacki Bryant Ilan Vertinsky Benedicte Vidaillet Jane Webster Karl E Weick Benjamin Wellstein George Wright Kuo Frank Yu and David Zweig   Innovation, Evolution and Economic Change Blandine Laperche,James K. Galbraith,Dimitri Uzunidis,2006-01-01 John Kenneth Galbraith was an eminent economist and proponent of change The contributors to the book further his analysis on the evolution of capitalism taking into account changes to the general economic climate since the publication of J K Galbraith s main thesis they outline new ideas which form fertile ground for new research The book begins with a penetrating analysis of the main features of today s capitalism and in particular the conflict between shareholders and managers It moves on to focus on the consequences of globalization in the decision making processes of large corporations and represents an important step in the development of a theory of fraud and corruption within corporations In the final part the authors address and explore the consequences of the domination of influential groups over major social and political decisions on the blurred boundaries between the public and the private sectors and its consequences in the fields of technological regulation and the evolution of public services In so doing the authors question the meaning and power of democracy in today s society Innovation Evolution and Economic

Change will appeal to a wide readership and audience of economists policy makers and political organization   The Wiley Blackwell Handbook of Mindfulness Amanda Ie,Christelle T. Ngnoumen,Ellen J. Langer,2014-03-12 The Wiley Blackwell Handbook of Mindfulness brings together the latest multi disciplinary research on mindfulness from a group of international scholars Examines the origins and key theories of the two dominant Western approaches to mindfulness Compares contrasts and integrates insights from the social psychological and Eastern derived perspectives Discusses the implications for mindfulness across a range of fields including consciousness and cognition education creativity leadership and organizational behavior law medical practice and therapy well being and sports 2 Volumes   *Educational Administration and Leadership* David Burgess,Paul Newton,2014-12-05 This volume provides diverse perspectives and paradigms in educational administration and leadership Focusing on particular philosophical and theoretical schools of thought it traces the contemporary history of debates in the field while also exploring emerging non traditional schools for insight and potential contributions to educational administration in multi cultural contexts It critically examines trends and issues in society and their impact on educational theory and gives an overview of the scholarly study of organizations administration and leadership to develop introductory understandings of significant concepts and theories   Resilience Engineering Perspectives, Volume 1 Christopher P. Nemeth,2016-12-05 In the resilience engineering approach to safety failures and successes are seen as two different outcomes of the same underlying process namely how people and organizations cope with complex underspecified and therefore partly unpredictable work environments Therefore safety can no longer be ensured by constraining performance and eliminating risks Instead it is necessary to actively manage how people and organizations adjust what they do to meet the current conditions of the workplace by trading off efficiency and thoroughness and by making sacrificing decisions The Ashgate Studies in Resilience Engineering series promulgates new methods principles and experiences that can complement established safety management approaches providing invaluable insights and guidance for practitioners and researchers alike in all safety critical domains While the Studies pertain to all complex systems they are of particular interest to high hazard sectors such as aviation ground transportation the military energy production and distribution and healthcare Published periodically within this series will be edited volumes titled Resilience Engineering Perspectives The first volume Remaining Sensitive to the Possibility of Failure presents a collection of 20 chapters from international experts This collection deals with important issues such as measurements and models the use of procedures to ensure safety the relation between resilience and robustness safety management and the use of risk analysis The final six chapters utilise the report from a serious medical accident to illustrate more concretely how resilience engineering can make a difference both to the understanding of how accidents happen and to what an organisation can do to become more resilient **Organizational Cognition** Theresa K. Lant,Zur Shapira,2000-07-01 Organizational Cognition is a collection of chapters written by scholars from around the world The editors outline the history of two approaches to the study of cognition in

organizations the computational approach and the interpretive approach The chapters represent some of the most cutting edge research on organizational cognition covering research that spans many levels of analysis Much of the work in the book demonstrates how computational and interpretive approaches can be combined in a way that provides greater insight into cognitive processes in and among organizations The editors conclude by elaborating the likely boundary conditions of each approach and how they can be combined for a more complete understanding of cognition in organizations   Frontiers of Human-Centered Computing, Online Communities and Virtual Environments Rae Earnshaw,2001-02-26 This volume presents the results of a joint National Science Foundation and European Commission Workshop which was set up to identify the future key strategic research directions in the areas of human centred interaction online communities and virtual environments   **Research Companion to the Dysfunctional Workplace** Janice Langan-Fox,Cary L. Cooper,Richard J. Klimoski,2007 From personality disorders to wars over territory this book chronicles unravels and reveals the true nature of problems at work uncovering the subversiveness counter productive behaviour and unspoken issues that management struggle with on a daily basis   **Documentation et bibliothèques** ,2007   Representations in Archaeology Jean Claude Gardin,Christopher Spalding Peebles,1992   Computing Anticipatory Systems American Institute of Physics,2000-06-15 This proceedings volume contains foundation of anticipation in any system and applications in all the areas of science economy biology cognition physics robotics etc Strong anticipatory systems deal with systems which behave in taking into account past present and computed future states The new mathematical and computational tools of incursion and hyperincursion are developed in this way In weak anticipatory systems the future states are predicted from models of these systems The domain of computing anticipatory systems is becoming a new frontier of science   **Emergent Computation** Stephanie Forrest,1991 Researchers in several fields are exploring computational systems in which interesting global behavior emerges from local interactions among component parts an approach called emergent computation In these systems interactions among simultaneous computations are exploited to improve efficiency increase flexibility or provide more realistic models of natural phenomena These 31 essays define and explore the concept of emergent computation in such areas as artificial networks adaptive systems classifier systems connectionist learning other learning and biological networks to determine what properties are required of the supporting architectures that generate them Many of the essays share the themes of design how to construct such systems the importance of preexisting structure to learning and the role of parallelism and the tension between cooperative and competitive models of interaction In the introduction Stephanie Forrest presents several detailed examples of the kinds of problems emergent computation can address These include showing how emergent computation can lead to efficiency improvements in parallel processing establishing the connection between emergent computation and nonlinear systems and comparing two search techniques to show how the emergent computational approach to a problem differs from other more conventional approaches Stephanie Forrest is Assistant
