Organizational Determinants of Budgetary Influence and Involvement Noah P. Barsky, 2013-10-11 Drawing on network theory from the organizational sociology literature this book examines issues related to which organizational factors determine how employees influence the budgeting process Data were collected from managers who participate in the budgeting process at a major apparel manufacturer Social network analysis was employed to measure how the structure of the network of managers affects the budgeting process The results show that budgetary influence is structurally determined and resides with managers holding central positions in the organizational network Thus while formal procedures determine which employees are involved in budgeting activities only centrally positioned managers actually influence budgetary outcomes The findings indicate that influence not involvement is the key to empowerment in the budgeting process This research suggests that researchers and practitioners should be aware of an organization's social structure when examining a participative budgeting process The difference between formal designs and actual influence is indicative of a rhetoric reality gap which can impair the effectiveness of management control systems

*Accounting* Ahmed Riahi-Belkaoui, 1989-05-23 This book is useful readable and intelligent survey of the emerging field of behavioral accounting a field that is doing much to narrow the gap between accounting and behavioral scholars and practitioners Personnel Psychology The relatively new field of behavioral accounting relies on the application of behavioral concepts from the social sciences for an understanding of the forces that underlie the accounting environment Here Belkaoui

presents the first comprehensive survey of behavioral accounting theories and findings organizing them into a systematic framework for the further study of behavioral accounting issues and questions The result is a new understanding of the behavioral environment of accounting and a guide to solving practical behavioral problems that result from the preparation and use of accounting information As Belkaoui demonstrates the quality of accounting information is often adversely affected by human perceptions attitudes predispositions and other behavioral characteristics Belkaoui fully explores the behavioral underpinnings of the problem by examining the behavioral dimensions of a wide range of accounting issues and practices including contingency approaches to the design of accounting systems functional and data fixation the practice of slack accounting and language goal setting participative budgeting and performance the human resource considerations in public accounting firms and finally cultural determinism in accounting By offering both a realistic appraisal of the theories behind behavioral accounting and a cogent statement of the questions still left unanswered Belkaoui makes a major contribution to the ongoing inquiry into the influence of behavioral factors on accounting practice
