Enhancing Organizational Performance Committee on Techniques for the Enhancement of Human Performance, Commission on Behavioral and Social Sciences and Education, Division of Behavioral and Social Sciences and Education, National Research Council, 1997-04-16

Total quality management (TQM) reengineering the workplace of the twenty-first century: the 1990s have brought a sense of urgency to organizations to change or face stagnation and decline according to Enhancing Organizational Performance. Organizations are adopting popular management techniques, some scientific, some faddish, often without introducing them properly or adequately measuring the outcome. Enhancing Organizational Performance reviews the most popular current approaches to organizational change: total quality management, reengineering, and downsizing, in terms of how they affect organizations and people; how performance improvements can be measured; and what questions remain to be answered by researchers. The committee explores how theory, doctrine, accepted wisdom, and personal experience have all served as sources for organization design. Alternative organization structures such as teams, specialist networks, associations, and virtual organizations are examined. Enhancing Organizational Performance looks at the influence of the organization's norms, values, and beliefs; its culture on people and their performance; identifying cultural levers available to organization leaders; and what is leadership. The committee sorts through a wealth of research to identify behaviors and skills related to leadership effectiveness. The volume examines techniques for developing these skills and suggests new competencies that will become required with globalization and other trends. Mergers, networks, alliances, coalitions: organizations are increasingly turning to new intra and inter-organizational structures. Enhancing Organizational Performance discusses how organizations cooperate to maximize outcomes. The committee explores the changing missions of the U.S. Army as a case study that has relevance to any organization. Noting that a musical greeting card contains more computing power than existed in the entire world before 1950, the committee addresses the impact of new technologies on performance. With examples, insights, and practical criteria, Enhancing Organizational Performance clarifies the nature of organizations and the prospects for performance improvement. This book will be important to corporate leaders, executives, and managers; faculty and students in organizational performance and the social sciences; business journalists; researchers; and interested individuals.

OE Communique, 1984     **The Success Paradigm** Michael E. Friesen, James A. purpose The significant examples presented here are the result of almost a decade of direct research and application in a very diverse set of organizations including Fortune 500 manufacturing and services firms non profit organizations health care organizations and public education The result is a specific process with enough detail for professional managers to read the book and implement the process in their own organizations CEOs and NPO professionals as well as business academics and upper level students should find significant examples in an array of industries and situations that make this reading especially worthwhile The approach described in this book centers around Critical Success Factors which Rockart introduced in 1979 It is a learning oriented approach to planning that the authors have implemented in a variety of settings including Boeing Air Midwest and Conway Hospital The important relationship between management control and strategic planning styles is discussed in several interesting chapters Another topic that the authors address is the reinventing of government and the feasibility of applying the process in that environment Several examples of governments who attempted the task are offered along with discussion of their level of success The approach described in this book is a powerful tool that can be used to develop a common vision in any organization
