Organizations And Strategies In Astronomy 4:

Organizations and Strategies in Astronomy Andre Heck,2012-12-06 I am most grateful to Andre Heck for his invitation to write a foreword to OSA Volume 4 I will use this valued opportunity to emphasise those topics in Vol 4 which I consider important even if other topics may be of even greater importance in the universal scale of things At the outset let me say that I commend Vol 4 to its readers it contains much of very great interest for organisations and strategies in astronomy A topic which I consider to be of very great importance at this time is Adverse Environmental Impact on Astronomy There are two papers on this topic in OSA 4 Cohen on Strategies for Protecting Radio Astronomy and Schwarz on Light Pollution Control The growth in the extent of use the power and spectral demand for radio transmission continues to increase virtually exponentially The impact on the listening services such as radio astronomy has been severe Only by creativity in developing new techniques for radio noise including legal transmissions reduction and by participating fully in the allocation process for radio frequencies has radio astronomy developed to the powerful investigative tool it is today *Radiation Hazard in Space* L.I. Miroshnichenko,2013-04-17 The mono graph contains 8 chapters and their contents cover all principal aspects of the problem 1 Introduction and brief history of the radiation problem and background information of radiation hazard in the near Earth and interplanetary space 2 General description of radiation conditions and main sources of charged particles in the Earth's environment and interplanetary space effects of space environment on spacecraft 3 Basic information about physical conditions in space and main sources of charged particles in the Earth's environment and interplanetary space in the context of Space Weather monitoring and prediction 4 Trapped radiation belts of the Earth ERB theory of their origin spatial and temporal dynamics and experimental and statistical models 5 Galactic cosmic rays GCR variations of energetic temporal and spatial characteristics long term modulation and anomalous cosmic ray ACR component modeling of their dynamics 6 Production of energetic particles SEPs at near the Sun available databases acceleration propagation and prediction of individual SEP event statistical models of solar cosmic rays SCR 7 Existing empirical techniques of estimating prediction and modeling of radiation hazard methodical approaches and constraints some questions of changes in the Earth's radiation environment due to changes of the solar activity level 8 Unresolved problems of radiation hazard prediction and spacecraft protection radiation experiments on board the spacecraft estimating of radiation conditions during interplanetary missions Space does not allow us to explain every time the solar terrestrial and radiation physics nomenclature used in current English language literature **The Observatory** ,2003 A review of astronomy varies *Strategies for Europe* Maurice Goldsmith,2014-05-09 Strategies for Europe Proposals for Science and Technology Policies evaluates proposals for developing strategies for European research policies in five priority areas fundamental research social sciences industrial innovation public involvement in science and technology and relations with developing countries The importance of the multidisciplinary approach in dealing with the kinds of problems that Europe has to solve in the future is emphasized

Comprised of seven chapters this book begins with an overview of the contribution that science and technology may make to the government of the human societies organized in the nation states of Europe The role of science policy in providing the necessary kind of wisdom that seems to be developing within the social sciences is discussed along with the importance of basic research in ensuring the continuity of scientific and technical development on a long term basis Subsequent chapters deal with the approach of the European Science Foundation to science and technology the contribution of the social sciences to the formulation of science and technology policies industrial innovation and public involvement in science and technology and Europe s relations with developing countries The book concludes by offering recommendations for developing appropriate science and technology policies for Europe This monograph will be of interest to science policymakers
