Lee,James J. Mongan,2012-02-10 Two leading physicians prescription for solving our health care problems organizing the fragmented system that delivers care One of the most daunting challenges facing the new U S administration is health care reform The size of the system the number of stakeholders and ever rising costs make the problem seem almost intractable But in *Chaos and Organization in Health Care* two leading physicians offer an optimistic prognosis In their frontline work as providers Thomas Lee and James Mongan see the inefficiency the missed opportunities and the occasional harm that can result from the current system The root cause of these problems they argue is chaos in the delivery of care If the problem is chaos the solution is organization and in this timely and outspoken book they offer a plan In many ways this chaos is caused by something good the dramatic progress in medical science the explosion of medical knowledge and the exponential increase in treatment options Imposed on a fragmented system of small practices and individual patients with multiple providers progress results in chaos Lee and Mongan argue that attacking this chaos is even more important than whether health care is managed by government or controlled by market forces Some providers are already tightly organized adapting management principles from business and offering care that is by many measures safer better and less costly Lee and Mongan propose multiple strategies that can be adopted nationwide including electronic medical records and information systems for sharing knowledge team based care with doctors and other providers working together and disease management programs to coordinate care for the sickest patients **Designing Integrated Care Ecosystems** Bernard J. Women and Borders Seema Shekhawat,Emanuela C. Del Re,2017-12-18 Borders whether settled or contested violent or calm closed or open may have a direct and often acute human impact Those affected may be people living nearby those attempting to cross them and even those who succeed in doing so At the border vulnerable refugee and migrant communities especially women are exposed to state centred boundary practices paving the way for both their alienation and exploitation The militarization of borders subjugates the very position of women in these marginalized areas and often subjects them to further victimization which is facilitated by patriarchal socio cultural practice Structural violence is endemic to these regions and gender interlocks with their perimeters to reinforce and shape violence This book locates gender and violence along geographical edges and critically examines the gendered experiences of women as global border residents and border crossers Broadly it explores two questions First what are women s experiences of engaging with borders Second where are women positioned in the theory and practice of marking remarking and demarking these margins Offering a nuanced and thorough approach this book suggests that research on borders and violence needs to focus on how bordered violence shapes the embodiment of gender identity and norms and how they are challenged It examines an array of issues including forced migration trafficking and cross border ties to explore how gender and borders intersect
