Origins Of Civilization:

The Origins of Civilization Peter Roger Stuart Moorey, 1979 This collection of essays by leading scholars of archaeology and prehistory examines the emergence of permanent human settlements and the social political and religious ideas that may have accompanied this development Two introductory lectures sketch the emergence of man and his development as hunter farmer and fisherman Then taking civilization in its most precise sense separate essays review the evolution of urban societies in the Near East Europe China and Mesoamerica Final lectures address the role of religion in early human societies and the development of writing in the Old World This distinguished and highly accessible collection will appeal to both the specialist and the interested general reader

The Origins of Civilization Carroll L. Riley, 1972 In this interesting and highly informative book we are presented with an impressive view of the great movements in time of cultures and civilizations as they flowered and died Among the many discussed in this book are the Sumerian Babylonian Mycenaean Hittite Assyrian the always fascinating Etruscan and the Inca Aztec and Maya of the Americas Defining civilization as the city state inhabited by specialists politicians priests craftsmen laborers necessary in a society learning to cope with the complexities of urban life Mr Riley has made use of the most recent results of anthropological research and archaeological discovery in tracing man's cultural evolution Among the important aspects of this study of our beginnings is the evidence that man tends to develop in channeled directions toward civilization Mr Riley suggests that within each hemisphere though probably not between hemispheres this trend is reinforced by diffusion from center to center However coverage of the Old World and the New in the book is well balanced and includes much new material Special chapters are devoted to the most important areas such as Egypt Mesopotamia and Indus the Levant Crete the Greeks the Western Mediterranean China Mesoamerica and the Central Andes The book is illustrated with drawings and photographs as well as with maps and charts

The Breakout Martha Lamberg-Karlovsky, 2000-05-25. In the mid 1980s Kwang-chih Chang proposed that China's first civilization did not evolve according to the conventional Mesopotamian model and argued instead for a new paradigm for understanding the origins of civilization. In this collection, Maya and Near Eastern studies specialists engage in a stimulating debate of Chang's thesis. *The Origin of Civilisation and the Primitive Condition of Man* John Lubbock, 2023-10-14. Reprint of the original first published in 1875. *The Origin of Civilization and the Primitive Condition of Man* Sir John Lubbock, 1879. *Origin of Civilization* Teaching Company, 2010. Around 10,000 years ago, the small group of Paleolithic hunter-gatherers that had walked the earth for millennia gave way to increasingly complex Neolithic villages of agricultural producers. Around 4,000–5,000 years later, people had gathered in urban settings, established laws, and developed cultural and political systems. This remarkable change took place in Mesopotamia, on the North China plain, in the Indus Valley, in the Nile Valley, on Aegean islands, in Africa, and in America. What motivated these new forms of culture and social and political complexity? Why did they appear where they did? This course brings together findings from both archaeological and anthropological scholarship to answer these questions and to deepen our understanding of the first human states and civilizations.
