*Embodiment and Cultural Differences* Bianca Maria Pirani, Thomas Spence Smith, 2016-08-17 Embodiment

and Cultural Differences focuses on the body as the equilibrium limit between the memory of time already passed and the dynamic where of unexpected happenings The body s ecology is fulfilled in the surrounding environment within this variable limit Each embodiment operation is in fact an experimental setting that consists of the unrepeatable executive instants through which like a musical score the body synchronises human consciousness with the context of action What distinguishes the architecture of this book is that collectively it constitutes a challenge to the digital media paradigm in which the body is treated simply as a two dimensional icon of space and time a relatively free form with all kinds of narratives generated by the multimedia The volume demonstrates how fundamentally different ways of experiencing time are also determined by the differing cultural use of bodily rhythms Central to the understanding of this interdependence is the study of synchronisation increasing knowledge through the investigation of how rhythm music chants dance prayer and other harmonising practices support social integration The book also touches upon the anxieties fears and ambivalences affecting contemporary European societies particularly those that have followed in the wake of terrorist attacks and the influx of refugee populations The participating authors are all members of the International Sociological Association and part of the Research Committee 54 The Body in the Social Sciences This is in short a book that will attract wide interest especially from social scientists researchers and academics in the social sciences sociology and digital studies in addition to further afield for example in health philosophy education and anthropology
