Phenomenological Investigations of Sonic Environments Martin Nitsche,Ivan Gutierrez,Jiří Zelenka,Vít
Pokorný,2024-08-12 Phenomenological approaches to sounds noises voices and music traditionally privilege methods that
center visual perception This book aims not only to phenomenologically describe sonic environments but also to develop an
audition centered phenomenological methodology to enable this task Sonic environment is this book s term for the acoustic
shape of human life environment which is multisensory and does not exclude visual tactile olfactory and gustatory sensations
connected with sounds or their sources Sonic environments in so far as they are lived are not composed of separate sounds
but created by sonic phenomena i e lived real or imagined experiences with sounds noises voices and music Just as
phenomenology traditionally privileges the visual over the audio phenomenology thematically prefers listening to a voice or a
music over less articulated sonic experiences i e sounds without an obvious meaning melody or rhythm In this respect the
book not only provides missing phenomenological descriptions of sonic environments but also redefines phenomenological
methodology with respect to acoustic perception **Instructor** ,1977 **Music in American Schools, 1838-1988** Bruce
