Keunne, 1990-06-18 The first in a two volume tribute to Walter Isard the second being *Dynamics and Conflict in Regional structural Change* this book looks at new frontiers in regional science Together they contains 50 papers by experts in this field and look at subjects such as location theory      **Development Studies in Regional Science** Zhenhua Chen, William M. Bowen, Dale Whittington, 2020-02-21 This book examines major policy and planning issues in development studies from the regional science perspective It investigates questions such as How are communities able to deal with uncertainties raised by conflicts technology and external shocks in the process of development How can nations achieve sustainable development in terms of resource allocation and management and How can developing countries improve their economic competitiveness while maintaining the objectives of equitable and coordinated growth among different regions using case studies that focus on different subfields like infrastructure environment data science sustainability and resilience The book is organized in three parts Part I clarifies fundamental issues regarding development studies and regional science in general while Part II includes several case studies that address development related opportunities and challenges with a focus on Asian countries Lastly Part III offers a global perspective and explores development experiences from countries throughout the world Featuring contributions by leading academics and practitioners working at various organizations linked to international development and including multidisciplinary analyses the book appeals to students who are interested in development studies and regional science It also offers planners and policymakers fresh insights into regional economic development

*Regional Science: Perspectives for the Future* Manas Chatterji, 2016-07-27 This book contains up to date original contributions by some of the world s best known experts in the area of urban and regional science Regional science provides the theoretical basis of urban and regional planning The subject covers such topics as regional development regional accounts spatial price computation regional and interregional knowledge networks and measurement of regional quality of life A considerable amount of change has taken place in the spatial pattern of socio economic activities and their interactions over the last half of the century leading to the need for more advanced tools of analysis in regional science This book fulfils this need      **A Broad View of Regional Science** Soushi Suzuki, Roberto Patuelli, 2021-01-19 This book celebrates the life and work of Peter Nijkamp whose research provides a strong focus on regional science His work follows a rigorous comprehensive approach centred around analytical modelling and methodological innovation This edited volume like Prof Nijkamp s research covers a wide range of topics in regional science analysed through multi criteria evaluation evaluation modelling econometrics and simulations among other methods These tools are applied to the analysis of society and culture tourism and information cities environment and sustainability Professor Nijkamp is one of the founders and the past

president of the Regional Science Association International His work forms a valuable reference for researchers scholars policymakers and students in the field of regional science and other disciplines This volume timed to coincide with his 75th birthday celebrates Prof Nijkamp s great contributions to regional science He also promoted and participated in the education and development of young researchers not only in regional science but also in other fields supervising many Ph D students and hosting even more as guests in Amsterdam Contributors to this volume include Prof Nijkamp s former doctoral students and guest researchers as well as associates and colleagues

**Great Minds in Regional Science** Peter Batey, David Plane, 2020-07-31 This is the first volume in a new series on Great Minds in Regional Science which seeks to present a contemporary view on the scientific relevance of the work done by great thinkers in regional science It presents among others Walter Isard Martin Beckmann and Gunnar Myrdal Each contribution combines factual biographical information a description of their major contributions and a discussion of the broader context of the work as well as an assessment of its current relevance scientific recognition and policy impact The book attempts to fill a gap in our knowledge and to respond to the growing interest in the formation and development of the field of regional science and its key influential figures

*Principles of Regional Science* Zheng Wang, 2017-10-17 This book summarizes the research findings in regarding a region as a rational and abstract concept and explores the principles of regional science Focusing on location theory spatial dynamics and regional evolution theory it stresses that the region as a scientific concept is an essential abstract of an economic entity of a place While it introduces a number of case studies the content is general and universal rather than specific Beginning with location theory the basis of regional science it explains how regions breed their own characteristics as economic entities against a background of place For example it discusses the location theory of the tourism industry and analyzes issues of facility location and R D industry location theory The second part of the book addresses interactions with the spatial dynamics including the dynamic mechanism of regions against a background of space Spatial dynamics which includes concepts from statistical physics provides insights into the dynamic mechanism of aggregation diffusion and industrial clustering in regional science as well as in geography and economics The book then describes regional dynamics as a development of spatial dynamics REGION is completely independent as a research object and is no longer part of spatial dynamics This book also discusses in detail regions as the dynamic characteristics of the economy or the basic characteristics of a certain place and examines the theory of regional evolution It argues that regions are evolution and irreversible features of development with path dependence which are the characteristics of a region that differ from general economic phenomena This book by Professor Zheng Wang is outstanding Its focus on Regional Science will open this area up to a wide variety of theoretical and applied researchers I recommend the work without reservations It covers critically important principles in the field and should be read and used by students faculty and applied researchers doing policy analysis I can see this as an important handbook and reference work as well as a textbook in the field Kingsley Haynes

*Socioeconomic Environmental Policies and Evaluations in Regional Science* Hiroyuki Shibusawa, Katsuhiro Sakurai, Takeshi Mizunoya, Susumu Uchida, 2016-09-07 This book is a volume of essays celebrating the life and work of Yoshiro Higano professor of Environmental Policy Doctoral Program in Sustainable Environmental Studies Graduate School of Life and Environmental Sciences University of Tsukuba Japan Prof Higano's research strongly focuses on the comprehensive evaluation of resources and research content for decision science and engineering including simulation modeling for environmental quality control the evaluation of environmental remediation technologies integrated river lake basin management and synthesized environmental policy Yoshiro Higano is the past president of the Regional Science Association International RSAI and the current president of the Japan Section of the RSAI JSRSAI He also served as executive secretary for the Pacific Regional Science Conference Organizations PRSCO This edited volume covers a wide range of regional science approaches theory policy evaluation modeling simulation and practice It is a valuable reference work for researchers scholars policy makers and students in the field of regional science The volume celebrates Prof Higano's contributions to the JSRSAI PRSCO and RSAI Essay contributors include his former students and a wide array of regional scientists each with a personal connection to Prof Higano

**Tourism and Regional Science** Soushi Suzuki, Karima Kourtiti, Peter Nijkamp, 2021-07-27 This book provides new roads perspectives and a synthesis for tourism and regional science research Tourism has become one of the most dynamic sectors in the economy and has exhibited a structurally growing importance over the past decades In many countries the economic significance of tourism now exceeds that of traditionally strong sectors like agriculture or transportation It is noteworthy that in recent times tourism research has gained great momentum from the perspective of the leisure society the psychological tension between hard work and a more relaxed lifestyle and the productivity enhancing or productivity diminishing effects of leisure recreation and tourism An abundance of new literature in the field of tourism management can also be found for instance in the areas of hospitality management cultural events management destination competitiveness policy and marketing and transportation and logistics strategies while much attention is also being paid to the opportunities provided by digital technology for the tourism sector In addition in the light of the many negative externalities of a rapidly growing tourism sector there is also an abundant literature on the environmental and sustainability effects of tourism This book has the following objectives to explore the interwoven connection between regional science and tourism research to suggest promising pathways for innovative regional science research at the interface of tourism and space and to demonstrate the need for a new perspective on the tourism and regional science nexus by means of empirical studies

**Essays in Honour of Walter Isard** Manas Chatterji, Robert E. Kuenne, 1990 Theory and History in Regional Perspective Masamichi Kawano, Karima Kourtiti, Peter Nijkamp, Yoshiro Higano, 2022-05-14 This collection of essays presents insight and methodology that are highly relevant for readers today as they consider the future of the world they live in Experiencing the COVID 19 pandemic people have realized how fragile the

current economy is and the necessity for reconstructing the socio economic system That system which was considered the default for so long was succeeded by the analytical framework of economics and regional science The contents of this book are diversified as are the achievements of Prof Yasuhiro Sakai to whom this volume is dedicated and cover a wide area from mathematical and experimental economics to conventional and emerging fields of regional science Some are timeless topics that have had new life breathed into them Part I deals with among other areas risk management with uncertain events the effectiveness and impacts of regulation and friction related to trading the stability of strategic behavior and market equilibrium and sustainable regional development and urban planning from the long term perspective Part II also presents a diversity of subjects including input output analysis and computable general equilibrium CGE modelling for internal as well as external structure and network linkage such as a value chain openness and creativity as related to competition among cities and regions dispersion versus concentration and inequality versus equality

*Planning Models* Aura Reggiani, Kenneth Button, Peter Nijkamp, 2006 While planning involves seeking ways of influencing future behavior it is important to have at the outset an abstraction of the world upon which to base an assessment of outcomes The papers in this collection represent some of the major works in the field of planning models with land use planning as a core theme The collection is divided into several parts Part 1 focuses on location models and embraces a series of classic survey papers as well as a number of more specific contributions covering such topics as the distribution of residential activities This is followed in part 2 by papers concerned with spatial interaction and in particular the gravity model Part 3 of the collection contains papers on micro macro models that look at ways of moving from individual to collective behavior whilst part 4 is concerned with dynamic models Part 5 of the volume reflects an increasing interest in the role of various networks in the formulation of plans and finally part 6 completes the volume with a selection of policy planning models
