Albritton, 1999-06-08 Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser Original reinterpretations of thinkers including Hegel Weber Althusser Derrida and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction drawing upon insights from philosophy sociology political science and critical theory Finding a non essentialist way of using the immense cognitive power of dialectics accepting a limited deconstruction but challenging further deconstructionist directions represents a major breakthrough for political economy

The New Dialectic and Marx's Capital Chris Arthur, 2021-08-04 This book argues that the dialectic of Marx's Capital has a systematic rather than historical character It sheds new light on Marx's great work while going beyond it in many respects **Political Economy and Global Capitalism** Robert Albritton, Bob Jessop, Richard Westra, 2010 This volume brings together original and timely writings by internationally renowned scholars that reflect on the current trajectories of global capitalism and in the light of these consider likely possible or desirable futures It offers theory informed writing that contextualizes empirical research on current world historic events and trends with an eye towards realizing a future of human social and economic betterment *The New Dialectic and Marx's Capital* Christopher John Arthur, 2004 This book argues that the dialectic of Marx's Capital has a systematic rather than historical character It sheds new light on Marx's great work while going beyond it in many respects **Economics Transformed** Robert Albritton, 2007-05-20 Is Marx relevant Bringing to life the classic concepts in Marx's economic thought Robert Albritton shows that he offers great potential for study Deeply critical of the way economics is taught and studied today this is a textbook that will appeal to anyone who wants a forward thinking approach to the discipline that's free from the constraints of neo classical orthodoxy Taking up key aspects of Marx's work including surplus value theory dialectical reasoning and the commodity form Albritton

highlights their relevance in the modern world and explains why mainstream economics has been so blind to their revolutionary potential. Written with style and clarity it is perfect for economics undergraduates. *From Political Economy to Economics* Dimitris Milonakis, Ben Fine, 2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme. So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection. The authors show how economics was once rich, diverse, multidimensional and pluralistic and unravel the processes that lead to orthodoxy's current predicament. The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology. It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists, historians and other social scientists. This has resulted in an impoverished historical and social content within mainstream economics. The book ranges over the shifting role of the historical and the social in economic theory, the shifting boundaries between the economic and the non economic all within a methodological context. Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx, the German and British historical schools, American institutionalism, Weber and Schumpeter and their programme of Social Konomik and the Austrian school. At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore. The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda. This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras. It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism. Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future.

Adorno and Marx Werner Bonefeld, Chris O'Kane, 2022-06-02 While Adorno has tended to be read as a critic of the administered world and the consumer industry rather than a Marxist, Adorno and Marx establishes Adorno's negative dialectics as fundamental for understanding Marx's critique of political economy. This conception of the critique of political economy as a critical theory marks both a radical departure from traditional Marxist scholarship and from traditional readings of Adorno's work and warns against identifying Adorno with Marx or Marx with Adorno. Rather it highlights the intersection between Adorno's critical theory and Marx's critique of political economy that produces a critical theory of economic objectivity that moves beyond Marxian economics and Adornonian social theory. Adorno and Marx offers an ingenious account of critical social theory. Its subversion of the economic categories of political economy contributes to the
