New Face Of War:

The New Face of War Bruce D. Berkowitz, 2010-05-11 As American and coalition troops fight the first battles of this new century from Afghanistan to Yemen to the Philippines to Iraq they do so in ways never before seen Until recently information war was but one piece of a puzzle more than a sideshow in war but far less than the sum total of the game Today however we find information war revolutionizing combat from top to bottom Gone are the advantages of fortified positions nothing is impregnable any longer Gone is the reason to create an overwhelming mass of troops now troop concentrations merely present easier targets Instead stealth swarming and zapping precision strikes on individuals or equipment are the order of the day based on superior information and lightning fast decision making In many ways modern warfare is information warfare Bruce Berkowitz's explanation of how information war revolutionized combat and what it means for our soldiers could not be better timed As Western forces wage war against terrorists and their supporters in actions large and small on several continents The New Face of War explains how they fight and how they will win or lose There are four key dynamics to the new warfare asymmetric threats in which even the strongest armies may suffer from at least one Achilles heel information technology competition in which advantages in computers and communications are crucial the race of decision cycles in which the first opponent to process and react to information effectively is almost certain to win and network organization in which fluid arrays of combat forces can spontaneously organize in multiple ways to fight any given opponent at any time America's use of networked elite ground forces in combination with precision guided bombing from manned and unmanned flyers turned Afghanistan from a Soviet graveyard into a lopsided field of American victory Yet we are not invulnerable and the same technology that we used in Kuwait in 1991 is now available to anyone with a credit card and access to the Internet Al Qaeda is adept in the new model of war and has searched long and hard for weaknesses in our defenses Will we be able to stay ahead of its thinking In Iraq Saddam's army is in no position to defeat its enemies but could it defend Baghdad As the world anxiously considers these and other questions of modern war Bruce Berkowitz offers many answers and a framework for understanding combat that will never again resemble the days of massive marches on fortress like positions The New Face of War is a crucial guidebook for reading the headlines from across our troubled planet

regulation of ethno national conflict through power sharing Exploring the roles played by Syria Qatar Iran Saudi Arabia the United States and France it argues that external actors in the Lebanese conflict largely determined whether power sharing was successfully established and shows that the consociational democratic model cannot provide long term conflict regulation in their absence The author argues that relationships between internal and external actors determine the prospects for successful conflict regulation and pinpoints the crucial role of the external forces in the creation of power sharing agreements in Lebanon concluding that future success is dependent on the maintenance of positive exogenous pressures This book will be of key interest to students and scholars studying politics international relations and Middle East studies

The Senkaku Paradox Michael E. O'Hanlon, 2019-04-30 America needs better options for resolving potential crises In recent years the Pentagon has elevated its concerns about Russia and China as potential military threats to the United States and its allies But what issues could provoke actual conflict between the United States and either country And how could such a conflict be contained before it took the world to the brink of thermonuclear catastrophe as was feared during the cold war Defense expert Michael O Hanlon wrestles with these questions in this insightful book setting them within the broader context of hegemonic change and today s version of great power competition The book examines how a local crisis could escalate into a broader and much more dangerous threat to peace What if for example Russia s little green men seized control of a community like Narva or an even smaller town in Estonia now a NATO ally Or what if China seized one of the uninhabited Senkaku islands now claimed and administered by Japan or imposed a partial blockade of Taiwan Such threats are not necessarily imminent but they are far from inconceivable Washington could be forced to choose in these and similar cases between risking major war to reverse the aggression and appeasing China or Russia in ways that could jeopardize the broader global order O Hanlon argues that the United States needs a better range of options for dealing with such risks to

peace He advocates integrated deterrence which combines military elements with economic warfare The military components would feature strengthened forward defenses as well as possibly limited military options against Russian or Chinese assets in other theaters Economic warfare would include offensive elements notably sanctions as well as measures to ensure the resilience of the United States and allies against possible enemy reprisal The goal is to deter war through a credible set of responses that are more commensurate than existing policy with the stakes involved in such scenarios
