**Globalization, War, and Peace in the Twenty-first Century** William R. Nester,2010-11-15 Violence is as old as humanity Organized violence or war is as old as the first organized societies Throughout history most states were either preparing for engaging in or recovering from war Yet recently the threat or use of violence in international relations known as geopolitics has sharply diminished as nearly all states are at peace all or most of the time Nonetheless geopolitical conflicts instigated by rogue states militant ideologies transnational terrorist groups revolutionary movements or voracious ruthless economic interests continue to plague countries and regions around the world Although each geopolitical conflict has unique causes underlying them all is some volatile mix of the best and worst of human nature Many a war has been fought under the lofty banner of justice freedom and equality Many more however are provoked by the far darker motives of greed aggression fear vengeance hatred and ignorance Globalization War and Peace in the Twenty first Century explores humanity s most persistent and tragic problem by answering five crucial questions How is military power created and asserted How do international laws and organizations constrain war Why do nations go to war or stay at peace What continuities and changes characterize recent warfare What are weapons of mass destruction and what is the likelihood of them being used What are the source methods and results of terrorism and counterterrorism The emphasis is on recent headlines with case studies on the war against Al Qaeda the Iraq War the Israeli Palestinian conflict attempts by North Korea and Iran to become nuclear powers and other ongoing tragedies and threats All along the book reveals why geopolitics persists even though the ever thickening web of interdependent relations among nation states and peoples known as globalization sharply raises war s costs and reduces its benefits

**Terrorism's Unanswered Questions** Adam B. Lowther,Beverly Lindsay,2009 In the wake of the September 11 2001 attacks on the United States terrorism became a topic for the masses to explore rather than the hidden purview of analysts and scholars tucked away at the CIA or in the ivory tower Now more than five years later there remains much to be discovered about terrorism and its causes This volume takes

a look at some of terrorism's unanswered questions How do we define terrorism What threat does the United States face from weapons of mass destruction Why has international law failed to stop terrorism These are but three of the questions addressed in this volume Book Jacket

**Global Norms in the Twenty-first Century** Klaus-Gerd Giesen, Kees van der Pijl, 2006 Norms in the contemporary world system are no longer established exclusively through inter state agreement but increasingly are becoming truly global This is made possible by the rapid privatisation of law and the self regulation of the transnational private sector Other forces driving this epochal transformation are the overwhelming pre eminence of the United States the erosion of the role of the United Nations and the appearance of new actors such as subnational entities and NGO TMs They all contribute to the creation and ideological justification of new norms This collection brings together critical studies on this complex process Written by authors from eleven different countries both established scholars and young specialists the book challenges the often convenient rationalisations of regime theory the governance approach and post national TM or cosmopolitan TM democracy in order to explore the practical theoretical and ethical implications of the new world of global norms

**A Decade of Combating Radical Ideology** Muhammad Haniff Hassan, 2011

**Between the Rule of Power and the Power of Rule in Search of an Effective World Order** A. van Staden, 2007 The book discusses different models of world order traditional and modern Any practical application of the concept at issue will be affected by the prevailing power structure and to some degree reflect it The reality of American preeminence in the world today needs to be reconciled with the demand for international legitimacy

Postwar America James Ciment, 2007 Alphabetically arranged entries provide coverage of the diplomatic economic political and cultural events in the United States from the outbreak of the Cold War to the rise of the United States as the last remaining superpower

The New Age of Terrorism and the International Political System Adrian Guelke, 2009

**TERRORISM FREEDOM FIGHTERS ARMED STRUGGLE** Adrian Guelke questions whether terrorism has evolved into a new form of political violence or whether it remains essentially unchanged with violent acts by small groups pursuing their struggles against imperialism and the West He explores the varying perceptions of and reactions to violent acts in the developed and developing worlds both within and across national boundaries and examines how terrorist groups join the peace process and take their part in state society and legitimate government This stimulating and strongly argued interpretation of terrorism uncovers its theoretical and practical mainsprings and shows that 9 11 the subsequent attacks in London Madrid Bali and even the concept of a global war on terrorism may have changed perceptions and increased the fear of mass casualties but have not altered its basic nature
