Kapadia, Wenyaw Chan, Lemuel A. Moyé, 2017-07-12 Mathematical statistics typically represents one of the most difficult challenges in statistics particularly for those with more applied rather than mathematical interests and backgrounds Most textbooks on the subject provide little or no review of the advanced calculus topics upon which much of mathematical statistics relies and furthermore contain material that is wholly theoretical thus presenting even greater challenges to those interested in applying advanced statistics to a specific area Mathematical Statistics with Applications presents the background concepts and builds the technical sophistication needed to move on to more advanced studies in multivariate analysis decision theory stochastic processes or computational statistics Applications embedded within theoretical discussions clearly demonstrate the utility of the theory in a useful and relevant field of application and allow readers to avoid sudden exposure to purely theoretical materials With its clear explanations and more than usual emphasis on applications and computation this text reaches out to the many students and professionals more interested in the practical use of statistics to enrich their work in areas such as communications computer science economics astronomy and public health **Smart Sensing and Context** Paul Havinga, Maria Lijding, Nirvana Meratnia, Wegdam Maarten, 2006-10-23 This book constitutes the refereed proceedings of the First European Conference on Smart Sensing and Context EuroSSC 2006 held in Enschede Netherlands in October 2006 The 15 revised full papers and 14 revised short papers presented were carefully reviewed and selected from over 50 submissions *The Brickmaker*, 1893 Railway World, 1910 *United States Code* United States, 1994 Powering Science National Academies of Sciences, Engineering, and Medicine, Division

on Engineering and Physical Sciences, Space Studies Board, Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio, 2017-12-29 NASA's Science Mission Directorate SMD currently operates over five dozen missions with approximately two dozen additional missions in development. These missions span the scientific fields associated with SMD's four divisions: Astrophysics, Earth Science, Heliophysics, and Planetary Sciences. Because a single mission can consist of multiple spacecraft, NASA SMD is responsible for nearly 100 operational spacecraft. The most high profile of these are the large strategic missions often referred to as flagships. Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget, technology, and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners. This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs. It considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly balanced program containing a range of mission classes.

Orientalism and the Figure of the Jew Jeffrey S. Librett, 2014-11-03 *Orientalism and the Figure of the Jew* proposes a new way of understanding modern Orientalism. Tracing a path of modern Orientalist thought in German across crucial writings from the late eighteenth to the mid twentieth centuries, Librett argues that Orientalism and anti Judaism are inextricably entangled. Librett suggests further that the Western assertion of material power in terms of which Orientalism is often read is overdetermined by a spiritual weakness, an anxiety about the absence of absolute foundations and values that coincides with Western modernity itself. The modern West, he shows, posits an Oriental origin as a fetish to fill the absent place of lacking foundations. This fetish is appropriated as Western through a quasi secularized application of Christian typology. Further, the Western appropriation of the good Orient always leaves behind the remainder of the bad, inassimilable Orient. The book traces variations on this theme through historicist and idealist texts of the nineteenth century and then shows how high modernists like Buber, Kafka, Mann, and Freud place this historicist narrative in question. The book concludes with the outlines of a cultural historiography that would distance itself from the metaphysics of historicism, confronting instead its underlying anxieties.
