## **New Dark Age:**

New Dark Age James Bridle, 2018-07-17 New Dark Age is among the most unsettling and illuminating books I've read about the Internet which is to say that it is among the most unsettling and illuminating books I've read about contemporary life New Yorker As the world around us increases in technological complexity our understanding of it diminishes Underlying this trend is a single idea the belief that our existence is understandable through computation and more data is enough to help us build a better world In reality we are lost in a sea of information increasingly divided by fundamentalism simplistic narratives conspiracy theories and post factual politics Meanwhile those in power use our lack of understanding to further their own interests Despite the apparent accessibility of information we're living in a new Dark Age From rogue financial systems to shopping algorithms from artificial intelligence to state secrecy we no longer understand how our world is governed or presented to us The media is filled with unverifiable speculation much of it generated by anonymous software while companies dominate their employees through surveillance and the threat of automation In his brilliant new work leading artist and writer James Bridle surveys the history of art technology and information systems and reveals the dark clouds that gather over our dreams of the digital sublime

**Humanism: In Command or in Crisis?** Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an eclectic collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them

foundation of norms on nuclear weapons he looks not only at how such norms come about but how they can become contested or disappear A valuable contribution to the literature on norms in International Relations this volume will be of particular interest to scholars and students with an interest in the control of arms      *Medievalism, Politics and Mass Media* Andrew B. institution while others cautiously attempt to recast kinship in a way to reimagine mutual obligation through the generation of kinship practices understood as a perpetually evolving set of relational responses to finitude In doing so Charen considers the ways in which kinship is a plastic social response to embodied exposure both concealed and made more evident in the bloated feeble and broken individualities and nationalities that seem to dominate our social and political landscape today On the Politics of Kinship will be of interest to political theorists feminists anthropologists and social scientists in general
