Production and Speculative Capitalism Freya Schiwy, Alessandro Fornazzari, Susan Antebi, 2013-10-31 This collection of essays explores the interfaces between new information technologies and their impact on contemporary culture and recent transformations in capitalist production. From a transnational frame, the essays investigate some of the key facets of contemporary global capitalism: the ascendance of finance capital and the increasing importance of immaterial labor understood here as a post-Fordist notion of work that privileges the art of communication, affect, and virtuosity. The

contributors address these transformation by exploring their relation to new digital media YouTube MySpace digital image and video technology information networks etc and various cultural forms including the Hispanic television talk show indigenous video production documentary film in Southern California the Latin American stock market German security surveillance transnational videoconferencing and Japanese tourists use of visual images on cell phones The authors argue that the seemingly radical newness and alleged immateriality of contemporary speculative capitalism turns out to be less dramatically new and more grounded in colonial racial histories of both material and immaterial exploitation than one might at first imagine Similarly human interaction with digital media and virtuality ostensibly a double marker for the contemporary and economically privileged subject in fact reveals itself in many cases as transgressive of racial economic and historical categories *The New Media* Tapio Varis,1992 Innovation in Design, Communication and Engineering Teen-Hang Meen,Stephen Prior,Artde Lam,2015-07-23 This volume represents the proceedings of the 2014 3rd International Conference on Innovation Communication and Engineering ICICE 2014 This conference was held in Guiyang Guizhou P R China October 17 22 2014 The conference provided a unified communication platform for researchers in a wide range of fields from information technology Rethinking the Children's Television Act for a Digital Media Age United States.
