New Excalibur Development Of The Tank 1909 1939:

A New Excalibur A J Smithers, 1986-01-01 The idea of a mobile strong point out of which the tank developed probably occurred to most minds after our first experience of attacking strongly entrenched positions I first heard it suggested by an Intelligence Corps officer as early as the Battle of the Aisne the suggestion of using the Caterpillar tractor which has been experimented with at Aldershot in 1914 immediately arose but it was so obvious a development that it must have occurred simultaneously in many regiments and staff messes Thus stated John Charteris Sir Douglas Haig's Director of Military Intelligence Obvious development it may have been but the birth and infancy of the tank were nevertheless weighed down by the by a truly remarkable burden of handicaps in which the endeavour to solve the enormous number of technical problems which the construction of such a vehicle presented at times to pale into insignificance compared with the endless squabbles between the headstrong band of midwives and monthly nurses who gathered in its nursery It is essentially upon this ill associated bunch of interveners engineers soldiers and politicians which Jack Smithers concentrates on this fascinating study of the vehicle which was born out of the stalemate of the Western Front in the First World War As is inevitable in almost any work of history set in the first half of the century the figure of Winston Churchill looms large in the foreground but the role that he played in this instance is remarkable even by his standard when it is remembered that at the crucial time he was First Lord of the Admiralty and theoretically had nothing to do with warfare on land Foremost amongst the leading actors in the drama come Sir Eustance Tennyson d'Eyncourt Sir Ernest Swinton Bertie Stern Sir William Tritton and Walter Gordon Wilson Of the last few named will have heard but as the author says but for him there would have been no tank Not at any rate in 1916 This is the first exhaustive study of the men behind the earliest tanks and to quote the author again they quarrelled furiously at times is hardly surprising for these were strong willed men and great matters were at stake Who was right and who was wrong hardly matters There is honour enough for all of them The story of their quarrels and the machines they produced combine under Smithers skill full pen to make a remarkable and compelling study

World War II in Asia and the Pacific and the War's Aftermath, with General Themes Loyd Lee, 1998-10-23 A companion to World War II in Europe Africa and the Americas this volume reevaluates the most enduring literature on basic aspects of the war in Asia and the Pacific It also covers themes pertaining to societies at war culture the arts and science and technology as well as international relations and the postwar world Included are not only grand strategy military and naval campaigns and matters of diplomacy but also resistance collaboration prisoners of war and broad topics of the home front including chapters on gender issues film literature popular culture and propaganda This volume and its companion provide the first comprehensive historiographic reference work on the war Each chapter describes the state of knowledge on the topic relating each bibliographic reference to the chapter's themes and issues and concludes with a bibliography Recent original scholarship is included when it aids new understanding and older works of enduring value also find a place The essays in this volume will

The Second World War Tank Crisis Dick Taylor,2021-06-30 British Second World War tanks performed so badly that it is difficult to bring to mind any other British weapon of the period that provokes such a strong sense of failure Unfortunately many of the accusations appear to be true British tanks were in many ways a disgrace But why was Britain the country that invented them consistently unable to field tanks of the required quality or quantity throughout the conflict This perceived failure has taken on the status of a myth but like all myths it should not be accepted at face value it should be questioned and analyzed And that is what Dick Taylor does in this closely researched and absorbing study He looks at the flaws in British financial policy tank doctrine design production and development before and throughout the war years which often had fatal consequences for the crews who were sent to fight and to be murdered in mechanical abortions Their direct experience of the shortcomings of these machines is an important element of the story He also considers how British tanks compared to those of the opposition and contrasts tank production for the army with the production of aircraft for the RAF during the same period His clear sighted account goes on to explain how later in the conflict British tank design improved to the point where their tanks were in many ways superior to those of the Americans and Germans and how they then produced the Centurion which was one of the best main battle tanks of the post war era

Tank Tactics Roman Jarymowycz,2008-12-17 Explores the doctrinal strategic and tactical ideas behind World War II tank combat Contains detailed maps and diagrams Critiques the performances of commanders like George Patton Bernard Montgomery and others Focusing on five Allied tank operations from July to September 1944 Operations Goodwood Cobra Totalize and Tractable and Patton s tank battles around Arracourt armor expert Roman Jarymowycz draws on after action reports extensive battlefield reconnaissance recently discovered battle performance reviews and war diaries to evaluate the successes and failures of the art of armored warfare as practiced by Allied tank commanders in France in 1944
