Vision and Voyages for Planetary Science in the Decade 2013-2022 National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Planetary Science Decadal Survey, 2012-01-30 In recent years planetary science has seen a tremendous growth in new knowledge Deposits of water ice exist at the Moon's poles Discoveries on the surface of Mars point to an early warm wet climate and perhaps conditions under which life could have emerged Liquid methane rain falls on Saturn's moon Titan creating rivers lakes and geologic landscapes with uncanny resemblances to Earth's Vision and Voyages for Planetary Science in the Decade 2013-2022 surveys the current state of knowledge of the solar system and recommends a suite of planetary science flagship missions for the decade 2013-2022 that could provide a steady stream of important new discoveries about the solar system Research priorities defined in the report were selected through a rigorous review that included input from five expert panels NASA's highest priority large mission should be the Mars Astrobiology Explorer-Cacher (MAX-C) a mission to Mars that could help determine whether the planet ever supported life and could also help answer questions about its geologic and climatic history Other projects should include a mission to Jupiter's icy moon Europa and its subsurface ocean and the Uranus Orbiter and Probe mission to investigate that planet's interior structure atmosphere and composition For medium size missions Vision and Voyages for Planetary Science in the Decade 2013-2022 recommends that NASA select two new missions to be included in its New Frontiers program which explores the solar system with frequent mid-size spacecraft missions If NASA cannot stay within budget for any of these proposed flagship projects it should focus on smaller less expensive missions first Vision and Voyages for Planetary Science in the Decade 2013-2022 suggests that the National Science Foundation expand its funding for existing laboratories and establish new facilities as needed It also recommends that the program enlist the participation of international partners This report is a vital resource for government agencies supporting space science the planetary science community and the public

Visions into Voyages for Planetary Science in the Decade 2013-2022 National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Review of Progress Toward Implementing the Decadal Survey Vision and Voyages for Planetary Sciences, 2018-11-30 In spring 2011 the National Academies of Sciences Engineering and Medicine produced a report outlining the next decade in planetary sciences That report titled Vision and Voyages for Planetary Science in the Decade 2013-2022 and popularly referred to as the decadal survey has provided high level prioritization and guidance for NASA's Planetary Science Division Other considerations such as budget realities congressional language in authorization and appropriations bills administration requirements and cross division and cross directorate requirements notably in retiring risk or providing needed information for the human program are also necessary inputs to how NASA develops its planetary science program In 2016 NASA asked the National Academies to undertake a

study assessing NASA's progress at meeting the objectives of the decadal survey. After the study was underway, Congress passed the National Aeronautics and Space Administration Transition Authorization Act of 2017, which called for NASA to engage the National Academies in a review of NASA's Mars Exploration Program. NASA and the Academies agreed to incorporate that review into the midterm study. That study has produced this report, which serves as a midterm assessment and provides guidance on achieving the goals in the remaining years covered by the decadal survey, as well as preparing for the next decadal survey, currently scheduled to begin in 2020.

The Arctic in China's National Strategy Martin Kossa, 2024-02-02. This book locates the Arctic within the context of the People's Republic of China's PRC national strategy of the Great Rejuvenation of the Chinese Nation. Drawing on a range of sources published in Chinese and English, the author analyses Beijing's Arctic scientific activities and technological capabilities, including the research infrastructure, long-term goals, and the significance for China's understanding of the region, its Arctic identity, and international perceptions. Examining the region from the perspective of the Comprehensive National Security Outlook developed during the Xi Jinping era, the book focuses on military, economic, technological, and political components and considers the PRC's official and academic discourses and the views of the region within bilateral relations with Arctic states, outlining a science security and governance nexus in China's Arctic engagement. This volume will be of interest to scholars and students of Arctic geopolitics, Chinese studies, security studies, and foreign policy analysis. It will also appeal to policymakers and defence analysts in Arctic states and other regional stakeholders.

The First Official Frontier of the Massachusetts Bay ... Frederick Jackson Turner, 1914. *Exploring New Frontiers* OSBORN, 2021-08-06. **Official Report** American Association of School Administrators, 1930. Frontiers Past and Future Carl Abbott, 2006. Abbott offers a fruitful new way to read science fiction, one that also greatly enriches our understanding of western history and its impact on our collective imagination. Detailing the overlap of science fiction and western fiction, especially relating to their mutual interest in and concerns about frontier expansionism, he reveals an unsuspected common ground that informs the writings of both camps. Reviewing the work of many Hugo and Nebula Award winners, as well as drawing upon popular film and television series like the Buck Rogers serials, Abbott's study journeys across the far reaches of science fiction's universe.

United States review, 1927. Opening New Frontiers in Space National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on New Opportunities in Solar System Exploration: An Evaluation of the New Frontiers Announcement of Opportunity, 2008-07-21. The New Frontiers Program was created by NASA in 2002 at the recommendation of the NRC's decadal survey for solar system research. In order to optimize solar system research, the NRC recommended a series of principal investigator missions that encourage innovation and accomplish the main scientific objectives presented in the survey. Two of the five recommended missions have been selected, and as was also recommended in the survey, the NRC was asked in 2007 to provide criteria and guiding principles to NASA for determining the list of candidate missions. This book

presents a review of eight missions the three remaining from the original list of five from the survey plus five missions considered by the survey committee but which were not recommended Included in the review of each mission is a discussion of relevant science and technology developments since the survey and set of recommended science goals **The Colorado School of Mines Magazine** ,1925 *Home Mission Monthly* ,1895 Cumulative List of Organizations Described in Section 170 (c) of the Internal Revenue Code of 1986 ,2000 **Peace Handbooks: The Balkan states (I), no. 15-18** Great Britain.
