Leroy,2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives

Innovation in Environmental Governance R. K.

W. Wurzel, A. Jordan, A. R. Zito, Economic and Social Research Council, 2003 **EU Enlargement and the Environment**

JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU's mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal *Environmental Politics* *Climate Policy Changes in Germany and Japan* Rie Watanabe, 2012-04-27 *Climate Policy Changes in Germany and Japan* compares two decades of climate policy development in Germany and Japan It examines whether there is any difference between the types and levels of policy change in the two countries and if so what factors account for the difference Using a comparison of climate policy changes in Germany and Japan from 1987 to 2005 as a basis it also discusses the effectiveness and the limits of existing theories of policy change and policy process most notably the Advocacy Coalition Framework ACF Punctuated Equilibrium Approach and Multiple Stream Approach and explores the theoretical question as to how long term paradigmatic policy change takes place The book lastly presents a hypothetical model of the mechanisms of paradigmatic policy change The two countries form a useful comparative approach to the issue of climate change They represent the range of types and levels of changes in policies to control CO2 emissions in the industrial and energy sectors dependent variables while also demonstrating similarities in a number of independent variables the size and structure of their economies their shares in global GHG emissions their general policy making styles including strong administrative systems and close relationships between ministries and industries and their general environmental policies *Climate Policy Changes in Germany and Japan* will be of interest to students and scholars of environmental and comparative politics **New Instruments for Environmental Policy in the EU.** Jan Willem Biekart, 1998 *New Instruments for Environmental Policy in the EU.* Wolfram Cremer, Andreas Fisahn, 1998 New Instruments for Environmental Policy in the EU. Kurt Deketelaere, 1998 *New Instruments for Environmental Policy in the EU* Jonathan Golub, 1998-06-04 *New Instruments for Environmental Policy in the EU* provides a comprehensive analysis of the debate over new forms of environmental regulation in the European Union The conclusions draw attention to critical aspects of instrument design as well as the difficulty of accommodating national policy diversity without contravening EU and international tr Environmental Policy in Search of New Instruments B. Dente, 2013-03-09 Environmental policy is undergoing a dramatic transformation The problems connected with global change the need for preventative action and the growing importance of non source pollution call for new courses of action and new institutional arrangements In this situation it is fairly obvious that both the traditional command and control policy instruments and the more modern financial

and economic instruments are increasingly under stress This volume deliberately aims to break new ground in providing the conceptual tools necessary for the next generation of environmental policies In doing so it covers a wide interdisciplinary range from public policy analysis to international law and draws upon much international experience well reflected by the mixed composition of the contributors On the basis of a shared theoretical framework the book explores the potential of new policy instruments such as policy evaluation or mediation proposes alternative institutional arrangements for dealing with the issues classifies existing instruments and illuminates the process through which old and new tools can be set into operation
