Teaching TV Production in a Digital World Robert Kenny, 2001. Here's an exciting alternative approach to teaching first year television production to high school students. A combination of class instruction and independent video action projects prepares students for a year end video competition. The projects are based on the concept of thematic mapping and borrow knowledge from other academic subject areas to teach media and visual literacy broadcast history video production skills and multimedia animation. Kenny's exciting alternative approach to teaching first year television production to high school students uses a combination of direct instruction class discussion and independent and inter disciplinary video action projects to prepare students for a year end video competition. Engaging projects based on the concept of thematic mapping borrow knowledge and information from other academic subject areas to teach media and visual literacy broadcast history video production skills and multimedia animation. The instructor manual is supplemented by a student workbook which introduces students to instructional information through fill in the blanks questioning. The workbooks also contain checklists and background information to aid students in completing the projects. *Resources in Education*, 1998. **Library Media Connection**, 2000. The Teacher's Guide to Media Literacy Cyndy Scheibe, Faith Rogow, 2012. A Deeper Sense of Literacy is the first book to suggest that media literacy is both a content area and an approach to teaching that can be integrated into any subject area. It combines theory and practical application in a way that addresses the most important questions related to media literacy in education today: what is it? why is it important? how can you teach it across a wide range of curriculum areas and grade levels and does it work? Rather than focusing on how to teach media literacy, Scheibe and Rogow focus on actually using media literacy to teach lessons across the content areas. *Documentation Abstracts*, 1984. **Information and Behavior** Brent D. Ruben, 1985. **Encyclopedia of Body Image and Human Appearance**, 2012-04-11. This scholarly work is the most comprehensive existing resource on human physical appearance: how people's outer physical characteristics and their inner perceptions and attitudes about their own appearance/body image affect their lives. The encyclopedia's 117 full length chapters are composed and edited by the world's experts from a range of disciplines: social behavioral and biomedical sciences. The extensive topical coverage in this valuable reference work includes: 1. Important theories, perspectives and concepts for understanding body image and appearance. 2. Scientific measurement of body image and physical attributes: anthropometry. 3. The development and determinants of human appearance and body image over the lifespan. 4. How culture and society influences the meanings of human appearance. 5. The psychosocial effects of appearance: altering disease, damage and visible differences. 6. Appearance self change and self management. 7. The prevention and treatment of body image problems including psychosocial and medical interventions. Chapters are written in a manner that is

accessible and informative to a wide audience including the educated public college and graduate students and scientists and clinical practitioners Each well organized chapter provides a glossary of definitions of any technical terms and a Further Reading section of recommended sources for continued learning about the topic Available online via ScienceDirect or in a limited release print version The Encyclopedia of Body Image and Human Appearance is a unique reference for a growing area of scientific inquiry It brings together in one source the research from experts in a variety of fields examining this psychological and sociological phenomenon The breadth of topics covered and the current fascination with this subject area ensure this reference will be of interest to researchers and a lay audience alike
