**Adoption and impact of OER in the Global South** Cheryl Hodgkinson-Williams, Brazil Arinto, 2017-12-29 Education in the Global South faces several key interrelated challenges for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include unequal access to education, variable quality of educational resources, teaching and student performance, and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to build on and contribute to the body of research on how OER can help to improve access, enhance quality, and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education, as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa, and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice, and research in developing countries.

**Reflections on Postgraduate Supervision and Academic Development in an African Distance Education Environment** Tennyson Mgutshini, Thenjiwe Meyiwa, Amile Mavundla, 2024-03-05 Within postgraduate studies, student non-completion, attrition, and failure rates range from 29% to 65%. These unacceptably high failure rates have been attributed to wide-ranging influences. Even so, there is consensus that postgraduate supervision represents a critical enabling vehicle for student success. Reflections on postgraduate supervision and academic development in an African distance education environment offers a collection of scholarly contributions that focus on critical questions related to the practice of postgraduate supervision from the multiple perspectives of higher education institutions, postgraduate students, and supervisors. The inclusion of contributions from educators and learners in one manuscript makes this a unique text, one that should be the mainstay of any scholar engaged in postgraduate studies. The manuscript aptly makes the case for recognising that postgraduate preparation and supervision are the most critical contributing factors to the success of postgraduate learners, and by inference, they represent a significant panacea to many of Africa's social and economic skills.
