**You Have Not Yet Heard Your Favourite Song** Glenn McDonald, 2024-06-20 If you want to know anything about how music surfaces today how to find it or how to

create it you will find what you need right here Joseph Menn Washington Post writer For the first time in history almost every song ever recorded is available instantly Everywhere This book charts what music's dazzling digital revolution really means for fans and artists As a former data guru at the world's biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of Russell Ter in Norway to Christmas in the Philippines Statistically you have not yet heard your lifetime's favourite song This book will take you on a voyage of discovery through music's fast flowing new waters 10 bonus playlists of wonder included About the Author Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify's Data Alchemist His website Every Noise at Once [EveryNoiseAtOnce.com](http://EveryNoiseAtOnce.com) is an unprecedented computational map of the world's music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of All the Rave The Rise and Fall of Shawn Fanning's Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of Pivot and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Nettwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppy Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business like any business long before streaming happened Back when charts were based on people

reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardly Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy So you might have thought that fraud wouldn't be a big issue in streaming Buy the book and carry on reading **The Ultimate Digital Music Guide** Michael Miller, 2012-06-24 Everything You Need to Know about Digital Music Your hard core up to the minute how to guide Download rip store organize play stream anything anywhere Seriously into digital music Best selling how to author serious audiophile and eclectic music lover Michael Miller will help you get all the digital tunes you want whenever and wherever you want them Miller guides you through today's best new options from iTunes to Spotify helps you make the most of social music Internet radio and cloud music services even shows how to transform your home into a digital music paradise This book is packed with practical answers easy step by step instructions insider tips great ideas and new music sources you never knew existed For everyone who's passionate about music Discover brand new digital music services sites and devices that fit your lifestyle Find great new music on iTunes Amazon and sites you've never heard of Get the truth about piracy file sharing and copyright Find huge amounts of legally free music Rip store and organize Build your perfect music library Determine the best audio file format and compression rate for your collection Create simply amazing playlists Stream songs anywhere with Spotify Pandora Internet radio and the cloud Get great sound from your iPod or iPhone on your home audio system Build a whole house digital audio system the easy way Choose your best next media player Apple or otherwise Find and share tunes on Facebook Twitter Google and beyond **The Ultimate Digital Music Guide** Michael Miller, 2012 Everything You Need to Know about Digital Music Your hard core up to the minute how to guide Download rip store organize play stream anything anywhere Seriously into digital music Best selling how to author serious audiophile and eclectic music lover Michael Miller will help you get all the digital tunes you want whenever and wherever you want them Miller guides you through today's best new options from iTunes to Spotify helps you make the most of social music Internet radio and cloud music services even shows how to transform your home into a digital music paradise This book is packed with practical answers easy step by step instructions insider tips great ideas and new

**MY MUSIC BUSINESS: PRE-RELEASING STEPS and SPOTIFY ALGORITHM the Essential Guide** Palomine, 2022-07 [Evaluation and Credentialing in Digital Music Communities](#) H. Cecilia Suhr, 2014-11-07 In this MacArthur Report, Suhr explores digital music communities' use of evaluation games and digital badges for both casual music evaluators and musicians. The first case study focuses on audience evaluation via playing Spotify's Hit or Not game, where game players evaluate a song's hit potential. Suhr explores the gamification of learning and evaluation when the act of music evaluation turns into a game: what do the players learn and what may be the implications of this type of evaluation? The second, more in-depth case study on Indaba Music examines the process of gaining badges through involvement in contests. Suhr questions whether or not gaining badges holds significance for musicians. Taken as a whole, this report analyzes how digital badges are perceived by both music listeners and musicians. To what extent can digital badges be an effective way to represent and credit musicians' accomplishments and merits? What are the emerging challenges, benefits, and shortcomings in the use of digital badges as an alternative evaluation mechanism? How do the uses of digital badges in the context of assessing creativity intersect or diverge with the practices related to education and other non-creative fields? Provided by publisher.
