### **Multisensor Fusion**

Rajive Joshi,Arthur C. Sanderson,1999 The fusion of information from sensors with different physical characteristics such as sight touch sound etc enhances the understanding of our surroundings and provides the basis for planning decision making and control of autonomous and intelligent machines The minimal representation approach to multisensor fusion is based on the use of an information measure as a universal yardstick for fusion Using models of sensor uncertainty the representation size guides the integration of widely varying types of data and maximizes the information contributed to a consistent interpretation In this book the general theory of minimal representation multisensor fusion is developed and applied in a series of experimental studies of sensor based robot manipulation A novel application of differential evolutionary computation is introduced to achieve practical and effective solutions to this difficult computational problem
