Multinational Service Firms (RLE International Business) Peter Enderwick, 2013-01-04 This book presents a world survey of multinational firms in the key parts of the service sector The service sector has grown greatly in importance in recent years in many countries of the world Many of the key parts of the service sector that are growing most rapidly are dominated by large multinational firms and this has important implications for the future shape of the world economy and for closer economic integration between countries In addition the particular style and operations of multinational firms in one sector can provide useful lessons for multinational enterprise in other sectors The book examines the operations and the style of the firms considered and explores how they dominate their sectors It charts how the firms have developed discusses the critical issues facing them and suggests how present trends may continue in the future *International Management in Service Firms* Dirk Klimkeit, Pengji Wang, Huiping Zhang, 2024-05-22 This textbook examines how service firms manage their international operations For the first time it brings together insights from the fragmented literature on this subject into an accessible textbook Further it is unique in its focus on service firms internationalization and international management Beginning with an overview of the international environment in which service firms operate it subsequently describes multinational service firms and their internationalization processes strategies and organization Unlike most texts on international services the book goes beyond internationalization to address the ongoing management of service firms It not only addresses functions such as global service marketing financial management and human resource management but also discusses aspects such as global account management global service delivery and international project management as well as the topical issue of managing distributed virtual teams A dedicated chapter focuses on offshore shared services and business process outsourcing These chapters are complemented by a discussion on international corporate governance and corporate social responsibility The book is intended for students preparing for international careers in the service sector Each chapter includes case studies illustrations highlighted definitions a chapter summary and exercises **Hamburg, a global city? A case study on Hamburg's producer services and cultural industries** Anna-Lena Prüser, 2018-11-15 Bachelor Thesis from the year 2015 in the subject Geography Earth Science Economic Geography grade 1 3 University of Twente language English abstract This bachelor thesis examines a city's interlinkage in the globalizing processes and aims at answering the research question To what extent can Hamburg be qualified as a Global City in terms of its localization of global producer services and cultural industries Global cities are defined as local nodes of the corporate service sector and the cultural economy which are associated in a global network Following this an in depth analysis of Hamburg's performance on the economic and cultural dimension will be provided in order to clarify its global city status It will be innovative in two respects Firstly it will provide an incorporation of both dimensions economic and culture into its analysis in order to provide a more comprehensive and less biased estimate of a metropolis global city status a practice that has not been conducted in

the literature so far Secondly it will apply this dualistic approach to the city of Hamburg Even though it is the second largest city in Germany according to population numbers Hamburg has not yet been subject of detailed investigation by global city researcher In a SWOT analysis the strength weaknesses opportunities and threats of the producer service sector and the cultural economy are outlined in order to determine their basic situation the sectors integration in the global networks are discussed mainly on basis of the Globalization and World Cities Studies Research Network GaWC dataset and the data generated by Kratke 2010 By linking the local conditions with the global perspective on both sectors the not fully developed functional status of Hamburg as a global city becomes clear it is a global city in the second row Derived from this finding recommendations for a better involvement in the global networks are provided
