## **Multiple Paths To Knowledge In International Relations:**

Multiple Paths to Knowledge in International Relations Zeev Maoz,2004-01-01 Multiple Paths to Knowledge in International Relations provides a uniquely valuable view of current approaches and findings in conflict studies While expanding our knowledge of particular conflicts from the Crimean War to the Vietnam War to ongoing Palestinian Israeli instability the notable contributors also further our understanding of how to conduct research in international relations

**International Relations Theory of War** Ofer Israeli,2019-04-10 Covering 1816 2016 this book deals extensively with the international system as well as the territorial outcomes of several key wars that were waged during that time period providing an instructive lesson in diplomatic history and international relations among global powers Based on an in depth review of the leading theories in the field of international relations International Relations Theory of War explains an innovative theory on the international system developed by the author that he applies comprehensively to a large number of case studies The book argues that there is a unipolar system that represents a kind of innovation relative to other systemic theories It further posits that unipolar systems will be less stable than bipolar systems and more stable than multipolar systems providing new insights relative to other theories that argue that unipolar systems are the most stable ones The first chapter is devoted to explaining the manner of action of the two dependent variables systemic international outcome and intra systemic international outcome The second chapter presents the international relations theory of war and its key assumptions The third chapter precisely defines the distribution of power in the system The fourth chapter examines the theory s two key phenomena The fifth and last chapter presents the book s conclusions by examining the theoretical assumptions of the international relations theory of war

*How is Global Dialogue Possible?* Johanna Seibt,Jesper Garsdal,2014-12-11 Intercultural dialogue is often invoked in vague reference to a method that can build cross cultural understanding and facilitate global policy making This book clarifies the theoretical foundations of intercultural dialogue and demonstrates the practical significance of intercultural value inquiry combining the perspectives of philosophy conflict

research religious studies and education The SAGE Handbook of Conflict Resolution Jacob Bercovitch,Victor Kremenyuk,I William Zartman,2008-12-03 The SAGE Handbook of Conflict Resolution demonstrates the range of themes that constitute modern conflict resolution It brings out its key issues methods and dilemmas through original contributions by leading scholars in a dynamic and expanding field of inquiry This handbook is exactly what it sets out to be an indispensable tool for teaching research and practice in conflict resolution Peter Wallensteen Professor of Peace and Conflict Research Uppsala University and University of Notre Dame Bercovitch Kremenyuk and Zartman are among the most important figures in the conflict resolution field They have pieced together with the help of more than 35 colleagues from numerous countries a state of the art review of the sources of international conflict available methods of conflict management and the most difficult challenges facing the individuals and organizations trying to guide us through these conflict ridden times The collection is

brimming with penetrating insights trenchant analyses compelling cases and disciplined speculation They help us understand both the promise of as well as the obstacles to theory building in the new field of conflict resolution Lawrence Susskind Professor and Director of the MIT Harvard Public Disputes Program The last three sentences of this persuasive book We conclude this volume more than ever convinced that conflict resolution is not just possible or desirable in the current international environment It is absolutely necessary Resolving conflicts and making peace is no longer an option it is an intellectual and practical skill that we must all posses If you are part of that we intellectually or professionally you will find this book a superb companion Thomas C Schelling Professor Emeritus Harvard University and University of Maryland Conflict resolution is one of the fastest growing academic fields in the world today Although it is a relatively young discipline having emerged as a specialized field in the 1950 s it has rapidly grown into a self contained vibrant interdisciplinary field The SAGE Handbook of Conflict Resolution brings together all the conceptual methodological and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters The Handbook is designed to reflect where the field is today by drawing on the contributions of experts from different fields presenting in a systematic way the most recent research and practice Jacob Bercovitch is Professor of International Relations and Fellow of the Royal Society at the University of Canterbury in Christchurch New Zealand Victor Kremenyuk is deputy director of the Institute for USA and Canada Studies Russian Academy of Sciences Moscow He is also a research associate at IIASA I William Zartman is Jacob Blaustein Professor of Conflict Resolution and International Organization at the Nitze School of Advanced International Studies of Johns Hopkins University

**New Directions for International Relations** Alex Mintz,Bruce Russett,2005-02-11

Why does the academic study of international relations have limited impact on the policy community In New Directions for International Relations Mintz and Russett identify differences in methods of analysis as one cause of problematic unreliable results They discuss the problem and set the stage for nine chapters by diverse scholars to demonstrate innovative new developments in IR theory and creative new methods that can lay the basis for greater consensus *Global Institutions and Social Knowledge* Virginia M. Walsh,2004-05-21 This theoretical and empirical study examines the influence of global institutions on the generation of scientific knowledge Virginia Walsh s approach reverses the traditional focus of international relations literature which most often deals with how scientific knowledge influences institutions and offers an original way to look at international environmental governance After proposing a theory of institutional mechanisms by which global institutions shape the generation of knowledge the book turns to detailed case studies of two institutions in the under studied but vital area of marine science the Scripps Institute of Oceanography and the Inter American Tropical Tuna Commission to illustrate these mechanisms In part 1 Theory the book identifies three specific mechanisms or fixes that provide the means by which institutions shape the generation and use of knowledge With the positional fix key individuals use their social roles or positions in an institution to influence the beliefs of members or fix the direction of research The

statutory fix occurs when beliefs gain acceptance as a consequence of being embedded in rules or treaties The committee fix is illustrated in the regularized practices through which social groups accept statements as group beliefs Part 2 Evidence shows these mechanisms at work in the two case studies The Scripps Institution for example illustrates the positional fix as successive directors used their position to frame research The Inter American Tropical Tuna Commission on the other hand exemplifies both the statutory fix and the committee fix in its regulatory actions Economic Interdependence and Conflict in World Politics Mark J. C. Crescenzi,2005-08-31 This book explores one of the most important current topics in international relations whether trade diminishes or enhances conflict Mark J C Crescenzi adopts an original perspective arguing that the exit costs confronting states how hard it would be for them to replace the trade they are threatening to cut determines the credibility of the threat and the effect of such trade on the likelihood of political conflict The Search for a Common European Foreign and Security Policy Akan Malici,2008-03-15 In the 1970s Henry Kissinger lamented When I want to call Europe I cannot find a phone number Kissinger s implication was clear Although Europe was moving towards a union in reality it was lacking the necessary coherence Since then the institutional momentum of the EU towards a common foreign and security policy has increased considerably Yet the viability of this institutionalization effort is questionable This book advances a new perspective on this paradox It argues that in order to understand institutional success and failure one must investigate the changing cognitive propensities of leaders in key states forming the institution Proceedings of the 1998 ACM CIKM International Conference on Information and Knowledge Management Georges Gardarin,1998 International Relations and Scientific Progress Patrick James,2002 International Relations and Scientific Progress argues that a theory focusing on the structure of the international system may explain a wider and more interesting range of events in world politics than other alternatives The first part of the book assesses the meaning of progress in the discipline of international relations a process that culminates in the creation of a new concept the scientific research enterprise The second part review structural realism within that context and makes the case for an elaboration of structural realism by showing that a system level theory based on structure could have great unrealized explanatory potential The third part explores new directions most notably as related to empirical testing of an elaborated version of structural realism that focuses on both continuity and change in the international system Patrick James is professor of political science at the University of Missouri Regional Development Dialogue ,2005 An international journal focusing on third world development problems **Strategic Peacemakers** Molly M. Jones,1997 Beginning with the

premise that international relations must be approached from a multinational perspective The Logic of International Relations introduces students to the idea that transactions between nations are behavioral rather than structural Building on this perceptual analysis approach the text discusses how the political consciousness of key nations influences international events public opinion and policy choices The text also employs an interdisciplinary approach that shows students how international behavior is a result of the interplay of economic historical social and psychological factors **Proceedings of the Sixth International Conference on Information and Knowledge Management** Forouzan Golshani,Kia Makki,1997
