**Strategies Of Digitalization And Sustainability In Agrifood Value Chains** Isabelle Piot-Lepetit, Fatima El Hadad-Gauthier, 2025-03-04 Nowadays stakeholders of agrifood value chains are developing specific strategies regarding their sustainable transformations supported by digital technologies. These strategies are designing new activities within and outside the whole value chains and in each of their specific segments such as raw products supplies and machinery production transformation transportation and logistics distribution retail and consumption. The strategies developed by agrifood stakeholders related to the digitalization for more sustainability of their practices and activities are changing the way stakeholders are interacting and fuel in one way or another new reconfigurations of value chains. Most often sustainability initiatives explore new value added activities goods and services while digital initiatives acknowledge the opportunities resulting from the use of digital solutions such as sensors the Internet of Things e commerce platforms blockchain or robots and advanced data analytics based on big data cloud computing technologies or artificial intelligence applications. Digital and sustainable transformations have been explored in the literature for some time now by considering either the changes involved in farms companies and business activities or the necessary adjustments of the economic and regulatory environments. On the one hand, *Lifelong Learning in Public Libraries* focuses on the information needs and the developmental and psychological characteristics of diverse library users of all ages. Changes in ILI standards and comparisons of ILI with basic reading, media, digital, and cultural literacies are also described. Both books together should act as basic manuals for public librarians who promote lifelong learning. *Creating and Promoting Lifelong Learning in Public Libraries* also have helpful teaching hints for all librarians and other professionals who teach in a variety of settings.

These narratives of technological optimism and educational pessimism converge with increasing frequency as school groups, community leaders, and political rivals battle each other over the best way to wire the nation's schools: computerize every classroom and leave no child behind. Welcome to Cyberschool is the first book-length analysis of this confluence of technology and education in the information age. *Strategies for Digital Literacy Professional Development* Amy C.
