Blockchain Fundamentals for Web 3.0 Mary C. Lacity, Steven C. Lupien, 2022-10-07 Our book explains the movement to establish online trust through the decentralization of value, identity, and data ownership. This movement is part of Web 3.0, the idea that individuals rather than institutions will control and benefit from online social and economic activities. Our target audience is students, professionals, and managers who want to learn about the overall Web 3.0 landscape: the investments, the size of markets, major players, and the global reach, as well as the economic and social value of applications. We present applications that use Web 3.0 technologies to unlock value in DeFi, NFTs, supply chains, media, identity, credentials, metaverses, and more. Readers will learn about the underlying technologies, the maturity of Web 3.0 today, and the future of the space from thought leaders.
