The composer Ludwig Minkus represents one of

music TM's biggest mysteries Who was he Hardly anything is known about him and yet he occupied an influential position in the theatres of the Imperial ballet in late nineteenth century Russia He has been recognised as a predecessor of Tchaikovsky but as a musician is commonly held to have been so feeble as to be beneath contempt Yet despite the scorn heaped on him and his consequent obscurity Minkus is far from being forgotten Since the early 1960s his name has slowly begun to re surface Two works *Don Quixote* 1869 and *La Bayadère* 1877 have been presented in their entirety for the first time to new audiences all over the world The musical and dramatic power of both ballets has taken people by surprise The stories have a very real human appeal the choreography attracts the admiration of balletomanes and the music with its rhythm verve and beauty of melody holds attention and engages the heart wherever it is heard This introduction seeks to discover something more behind the blank façade of Minkus TM's life and work What do we actually know about him as a man and as an artist Are we able to apprehend his oeuvre as a whole and how much can we establish from the available material What is the nature of the music he created for those few works that have survived the years and that have come to the fore again recently to delight those who have ears to hear This study includes iconography from the life and times of the composer many musical examples from his works and a comprehensive bibliography and discography
