Enemy Images in American History

Ragnhild Fiebig-von Hase, Ursula Lehmkuhl, 1998-01-01 It seems to be a tenet of the human condition to perceive others as different and potentially hostile. In nearly all societies stereotypes are developed to stigmatize suspected enemies within and without. The American case is particularly interesting in this respect because American society consists of nothing but others to be open to others and welcome those who are different is one of the basic tenets of the country. However this principle often conflicts with the need to integrate all these strangers into a homogeneous governable society which causes the formation of hostile stereotypes of certain ethnic groups that do not fit in. The authors in this volume look at the development of these enemy images which form a fairly consistent pattern from the period of the American Revolution to the post World War II era. In doing so they focus on the question of to what extent these enemy images influence the formulation and outcome of foreign, domestic and immigration policies.

Reading Seminars I and II Richard Feldstein, Bruce Fink, Maire Jaanus, 1996-02-22 In this collection of essays Lacan's early work is first discussed systematically by focusing on his two earliest seminars Freud's Papers on Technique and The Ego in Freud's Theory and in the Technique of Psychoanalysis. These essays by some of the finest analysts and writers in the Lacanian psychoanalytic world in Paris today carefully lay out the background and development of Lacan's thought. In Part I Jacques Alain Miller spells out the philosophical and psychiatric origins of Lacan's work in great detail. In Parts II, III and IV Colette Soler, Eric Laurent and others explain in the clearest of fashions the highly influential conceptualization Lacan introduces with the terms symbolic, imaginary and real. Part V provides the first sustained account in English to date of Lacan's reformulation of psychoanalytic

diagnostic categories neurosis perversion psychosis and their subcategories their theoretical foundations and clinical applications ample case material is provided here Parts VI and VII of this collection take us well beyond Seminars I and II relating Lacan's early work to his later views of the 1960s and 1970s Slavoj Zizek explores the complex philosophical relations between Hegel and Lacan regarding the subject and the cause And Lacan's article On Freud's Trieb and the Psychoanalyst's Desire that appears here for the first time in English and is brilliantly unpacked by Jacques Alain Miller in his Commentary on Lacan's Text takes a giant step forward to 1965 where we see a crucial reversal in Lacan's perspective desire is suddenly devalued the defensive inhibiting nature of desire coming to the fore What then becomes essential is the drive as an activity related to the lost object that produces jouissance
