New Pathways in Science Arthur Stanley Eddington,1935      **New Pathways in Science** Arthur Stanley Eddington (Astronom),1947      *New Pathways in Science* Arthur Eddington,1947      **New Pathways in Science** Sir Arthur Stanley Eddington,1947      **Cosmic Prayer and Guided Transformation** Robert Govaerts,2012-08-29 This book presents a realistic and thoroughly spiritual outlook upon the entire created reality It lets us envisage that various created entities are participant in a relationship with God that becomes increasingly one of an intimate personal quality that is a relationship of love It thus invites discernment that the universal reality is valuable in its own right and not only as a good for the use of humanity Drawing mainly upon Scripture ancient writers especially Maximus the Confessor as well as contemporary natural sciences this book encourages the reader to perceive human salvation not as a lifting of humanity out of creation but as a transformation into God s presence in the midst of the wider created order It shows that Christian faith at its best does not exclude the wider creation but provides us with insight and hope for a harmonious being in God that is inclusive of creation It shows that Christian faith can be a resource that helps overcome the ecological crisis      Dictionary of Twentieth-Century British Philosophers Stuart Brown,2005-06-01 This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture      **Albert Einstein, Historical and Cultural Perspectives** Gerald Holton,Yehuda Elkana,2014-07-14 Based on papers presented at the Jerusalem Einstein Centennial Symposium in March 1979 this volume sets forth an articulated sequence of chapters on the impact of Einstein s work not only in science but in humanistic studies and problems such as international security in the nuclear age Originally published in 1982 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important

books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 Victorian Literature and the Physics of the Imponderable Sarah C Alexander,2015-07-28 The Victorians were obsessed with the empirical but were frequently frustrated by the sizeable gaps in their understanding of the world around them This study examines how literature and popular culture adopted the emerging language of physics to explain the unknown or imponderable New Pathways in Science Arthur Eddington,2018-11-11 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public To ensure a quality reading experience this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy to read typeface We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant The Cornellian Council Bulletin ,1930
