New Populist Reader:

The New Populist Reader Karl G. Trautman, 1997-11-13 The editor of this work argues that the contemporary American political scene is increasingly driven by populist demands This is the only book on American Politics which outlines this trend Using primary sources and analyses from government and the media the book examines the many aspects from all points of the political spectrum of populism It is divided into three sections covering economic cultural and governmental populism Each section contains unique stories told through informative reporting reasoned analysis and passionate oratory Freed from the traditional ideological conceptions of American politics this work allows the reader to understand the diverse nature of contemporary populism

Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense

Reader's Guide to American History Peter J. Parish, 2013-06-17 There are so many books on so many aspects of the history of the United States offering such a wide variety of interpretations that students teachers scholars and librarians often need help and advice on how to find what they want The Reader's Guide to American History is designed to meet that need by adopting a new and constructive approach to the appreciation of this rich historiography Each of the 600 entries on topics in political social and economic history describes and evaluates some 6 to 12 books on the topic providing guidance to the reader on everything from broad surveys and interpretive works to specialized monographs The entries are devoted to events and individuals as well as broader themes and are written by a team of well over 200 contributors all scholars of American history

The Transparency Fix Mark Fenster, 2017-07-18 Is the government too secret or not secret enough Why is there simultaneously too much government secrecy and a seemingly endless procession of government leaks The Transparency Fix asserts that we incorrectly assume that government information can be controlled The same impulse that drives transparency movements also drives secrecy advocates They all hold the mistaken belief that government information can either be released or kept secure on command The Transparency Fix argues for a reformation in our assumptions about secrecy and transparency The world did not end because Julian Assange WikiLeaks and Edward Snowden released classified information But nor was there a significant political change Transparency has become a buzzword while secrecy is anathema Using a variety of real life examples to examine how government information actually flows Mark Fenster describes how the legal regime's tenuous control over state information belies both the promise and peril of transparency He challenges us to confront the implausibility of controlling government information and shows us how the contemporary obsession surrounding transparency and secrecy cannot radically change a state that is defined by so much more than information

Berry and the Agrarian Tradition Kimberly K. Smith, 2014-01-17 Farmer and conservationist Wendell Berry has published more than thirty books making his name a household word among environmentalists From his Kentucky farm Berry preaches and practices stewardship of the land as he seeks to defend the value and traditions of farm life in an industrial capitalist society A central figure in the greening of American agrarianism Berry has been an advocate of small farming and traditional values who has tirelessly reminded readers that sustainable agriculture is more than a catchphrase Kimberly Smith now reveals the depth of his ideas and their relevance for American social and political theory Berry's central teaching focuses on the fragility of our natural and social worlds Smith's timely book revisits the problem of living a meaningful life in a world filled with both deadly perils and unimagined possibilities Hers is the first book to explore the implications of this central tenet and other key aspects of Berry's thought as well as his overall contribution to environmental theory and politics Smith shows how the many strands of Berry's thought can be woven together into a coherent agrarian philosophy Focusing on his relationship to the American agrarian and environmental traditions she examines how Berry's ecological agrarianism derives from the concept of grace or living in concert with nature and society Along the way she defends his social theory against accusations of utopianism shows how his moral theory subverts the notion of rugged individualism usually associated with farming and reviews his political theory's argument for decentralized democracy By assessing Berry's reformulation of democratic agrarianism Smith goes beyond any previous critiques of his writing and her exploration of Berry's moral vision shows that such vision is more relevant as America continues to move further away from its agrarian past **The Reader's**

Encyclopedia of the American West Howard Roberts Lamar, 1977 The American West is an evocative term that conjures up images of cowboys and Indians covered wagons sheriffs and outlaws and endless prairies as well as contemporary images ranging from national parks to the oil aerospace and film industries In addition the West encompasses not only the past and present of the area west of the Mississippi but also the frontier as it moved across each of the fifty American states offering the promise of freedom and a better life to pioneers and settlers in every era This authoritative comprehensive encyclopedia is a rich source of information about these many characteristics of the American West real and imaginary old and new stretching from coast to coast and throughout the country's history and culture **Reader's Guide to Periodical**

The Media and Neo-Populism Gianpietro Mazzoleni, Julianne

Stewart, Bruce Horsfield, 2003-02-28 Mazzoleni Stewart Horsfield and their contributors analyze the two way relationship of

the mass media and the contemporary phenomenon of extreme right wing neo populist political parties which emerged in the closing years of the 20th century across the world The success of Jean Marie Le Pen leader of the neo populist Front National in the first French presidential ballot in April 2002 shows that these extremist parties have strong if varying electoral support Drawn into reporting on the policies and antigovernment critiques of the new parties the mass communication institutions especially those engaged in news production have been challenged by a variety of unconventional but effective political campaign strategies that caused many media professionals considerable challenge Taking an approach informed by mass communication theory this book analyzes eight case studies of the interaction of news media dynamics and neo populism in Austria Australia France Canada India Italy the United States and the Latin American region against the background of widespread disenchantment with traditional parties and the complacency and cynicism of popularly elected governments Insights into media responses reveal how dependent on media coverage the neo populist parties were and how in many cases the media were initially unequal to the confronting ideologies of the new parties Although the news media exploited the new parties new parties exploited the news media as well in quite shrewd and original ways This is an important resource for scholars students and other researchers involved with political mass communications and right wing political organizations

Telepopulism Yoram Peri,2004 This is the first account of Benjamin Netanyahu s political communication strategy during his term as prime minister It presents the dramatic cultural and political changes that occurred in Israel in the 1990s with the creation of media centered democracy The author shows how Netanyahu used these to construct his political project Telepopulism **The Commoner** ,1901 *The Making of Black America: The black community in modern America* August Meier,1971 *The Rhetoric of Protest and Reform, 1878-1898* Paul H.
