## **Spotify Top Charts 2025 Edition:**

*Music Streaming around the World* David Hesmondhalgh, 2025-10-21 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program. Visit [www.luminosoa.org](http://www.luminosoa.org) to learn more. Music streaming platforms such as Spotify, Apple Music, YouTube, and those offered by Chinese web giant Tencent are now central to everyday musical activity across much of the world with enormous ramifications for musical culture in modern societies. Bringing together case studies from twelve countries, *Music Streaming around the World* provides the first international account of how streaming is shaping music culture today by considering the implications of streaming platforms for the production, distribution, and consumption of recorded music around the globe.

### **Musical Genre** Mads

*Krogh*, 2025-01-09 From recent decades digitization has emerged a myriad of techniques for mapping musical life, identifying patterns in sound or musical cultural practices and compiling labels, names, tags, and classes on an unprecedented scale. Proliferating genre catalogs in the context of digital platforms and the conjunction of genre with notions of, for example, mood and activity are among the consequences which challenge prevailing scene-based and identificational understandings in musical genre studies. This book answers to this challenge. Centering on the concepts of musical generic assemblage and abstraction, it offers new perspectives on musical genre fit for current times but with the potential for also reconsidering historical cases.

*Mood Machine* Liz Pelly, 2025-01-07 NATIONAL BESTSELLER A New Yorker, GQ, The Daily Telegraph, London and Library Journal Best Book of 2025. A 2025 Washington Post Notable Nonfiction, An NPR Books We Love Most pick. Winner of a Certificate of Merit from the 2025 ARSC Awards for Excellence. An unsparing investigation into Spotify's origins and influence on music, weaving unprecedented reporting with incisive cultural criticism illuminating how streaming is reshaping music for listeners and artists alike. Drawing on over one hundred interviews with industry insiders, former Spotify employees, and musicians, *Mood Machine* takes us to the inner workings of today's highly consolidated record business, showing what has changed as music has become increasingly playlisted, personalized, and autoplayed. Building on her years of wide-ranging reporting on streaming music, journalist Liz Pelly details the consequences of the Spotify model by examining both sides of what the company calls its two-sided marketplace: the listeners who pay with their dollars and data and the musicians who provide the material powering it all. The music business is notoriously opaque, but here Pelly lifts the veil on major stories like streaming services filling popular playlists with low-cost stock music and the rise of new payola-like practices. For all of the inequities exacerbated by streaming, Pelly also finds hope in chronicling the artist-led fight for better models, pointing toward what must be done collectively to revalue music and create sustainable systems. A timely exploration of a company that has become synonymous with music, *Mood Machine* will change the way you think about and listen to music.

[Should Spotify Bring Voice Assist Technology to the Smart Speaker Market?](#) Christopher Diller, Stewart Pursey, Richard Gentry, 2022 In 2018 Spotify started selling its shares publicly on the New York Stock Exchange The Swedish based start up that launched in 2008 was on its way to becoming the largest music streaming platform in the world At the time it was going public Spotify was used in 61 countries had 159 million active users and hosted a music library of 35 million songs Over the last decade Spotify has focused on increasing its music library available to stream and differentiating its brand from competitors by adding music videos live clips and podcasts to its service It has created a series of personalized playlists based on users preferences and song history It has also begun hosting live events All of these offerings have added to its popularity and brand loyalty from its streamers However one segment that Spotify has not tapped into an area that its competitors already dominate is the voice assist speaker system market Reports have shown that Spotify is looking to add voice assist capabilities to its platform and in turn considering the development of a proprietary smart speaker device By 2017 the voice assist speaker market had become a global phenomenon valued at USD 4 4 billion and is projected to reach USD 23 3 billion by 2025 Spotify has been focused on maintaining its lead in music streaming but now smart speaker manufacturing companies will be able to disintermediate Spotify as a non essential application breaking its connection to customers But with the current success of Spotify s music streaming platform and its competitors focused on the smart speaker segment that Spotify has no control over Spotify must decide whether or not to follow the first movers and enter the voice assist speaker market
