## **New Snapshot Elementary Level:**

**New Snapshot** Brian Abbs, Ingrid Freebairn, Chris Barker, 2003-01 New Snapshot is a revised edition of an English Language course which is written from a teenage viewpoint. It includes photostories, culture pages, projects, and songs and provides graded exercises and a focus on writing skills in the Language Booster. **New snapshot** Chris Barker, Brian Abbs, Ingrid Freebairn, Olivia Johnston, 2003. **Research for Materials Development in Language Learning** Brian Tomlinson, Hitomi Masuhara, 2010-11-18. This title examines current research in materials development and discusses their implications for the learning and teaching of languages. Recently there has been a dramatic increase in the attention given to materials development as an academic discipline. More universities are including modules on materials development on their MA in applied linguistics courses and more students are studying materials development in their PhD research. Yet to date there has been no publication focusing on reporting and discussing the results of research in materials development. This fills that gap, reporting on the results of recent research projects in materials development and discussing their implications for the learning and teaching of languages. The editors' introduction outlines the rationale, scope, and objectives of the book and reviews previously published reports of research in materials development. There are concluding chapters which point out implications for second language acquisition theory and research methodology. The book features suggestions for applications of the reported research for materials development and proposals for future action in research in materials development for language teaching. **Language booster** Brian Abbs, 2008. **English Language Learning Materials** Brian Tomlinson, 2008-03-17. This research collection presents a critical review of the materials used for learning English around the world. The first section includes a discussion of materials for specific learners and purposes such as young learners, self-study, academic writing, and general proficiency. The second section presents a detailed study of the materials used in Europe, Asia, North America, South America, Africa, and Australia and critically evaluates their effectiveness in the teaching of English to speakers of other languages. Taking both the teacher's and the learner's needs into consideration, the book makes a positive contribution to the future of research in materials development and has practical applications. This comprehensive critical analysis of materials in use around the world will be useful for academics researching materials development and applied linguistics and for students on postgraduate applied linguistics and ELT courses. **Effective Literacy Coaching** Shari Frost, Roberta Buhle, Camille L.
