**Axis of Convenience** Bobo Lo, 2009-08-01 Few relationships have been as misunderstood as the strategic partnership between Russia and China Official rhetoric portrays it as the very model of international cooperation Moscow and Beijing claim that ties are closer and warmer than at any time in history In reality however the picture is highly ambiguous While both sides are committed to multifaceted engagement cooperation is complicated by historical suspicions cultural prejudices geopolitical rivalries and competing priorities For Russia China is at once the focus of a genuine convergence of interests and the greatest long term threat to its national security For China Russia is a key supplier of energy and weapons but is frequently dismissed as a self important power whose rhetoric far outstrips its real influence

**Axis of Convenience** cuts through the mythmaking and examines the Sino Russian partnership on its own merits It steers between the overblown interpretation of an anti Western particularly anti American alliance and the complacent assumption that past animosities and competing agendas must always divide the two nations Their relationship reflects a new geopolitics one that eschews formal alliances in favor of more flexible and

opportunistic arrangements Ultimately it is an axis of convenience driven by cold eyed perceptions of the national interest In evaluating the current state and future prospects of the relationship Bobo Lo assesses its impact on the evolving strategic environments in Central and East Asia He also analyzes the global implications of rapprochement between Moscow and Beijing focusing in particular on the geopolitics of energy and Russia China U S triangularism **The Geopolitics Reader** Simon Dalby, Paul Routledge, Gearóid Ó Tuathail, 2003-08-01 The Geopolitics Reader offers an interdisciplinary sourcebook of the most important political geographical historical and sociological readings of geopolitics in the late twentieth century The Reader is divided into five parts which draw on the most illuminating examples of imperial Cold War contemporary geopolitics new environmental themes and multiple resistances to the practices of geopolitics The editors provide comprehensive introductions and critical comment at the beginning of each part and visual geopolitical texts in the form of political cartoons are integrated throughout Encouraging exploration of divergent viewpoints of global conflict and change this invaluable compendium includes readings by Martin Luther King Vaclav Havel and George Bush *Asia's New Geopolitics* Michael R. nostalgia and discuss how and why it matters that the new geopolitics takes place in an age of accelerated fragmented and digitalized global media. Timely and ambitious, this accessible collection reveals the far right ideas behind the return of geopolitics and the crisis of liberalism that paved its way. Humanitarian Intervention and Legitimacy Wars Richard Falk, 2014-08-21. In the aftermath of the Cold War, there has been a dramatic shift in thinking about the maintenance of peace and security on a global level. This shift is away from a preoccupation with how to prevent major wars between sovereign states to a preoccupation about non-state transnational warfare and violence and strife within states in a world order that continues to be juridically and politically delimited by spatial ideas of national sovereignty and national independence as signified by international boundaries. In this book, Richard Falk draws upon these changes to examine the ethics and politics of humanitarian intervention in the 21st Century. As well as analysing the theoretical and conceptual basis of the responsibility to protect, the book also contains a number of case studies looking at Iraq, Afghanistan, Kosovo, and Syria. The final section explores when humanitarian intervention can succeed and the changing nature of international political legitimacy in countries such as India, Tibet, South Africa, and Palestine. This book will be of interest to students of International Relations, theory, Peace Studies, and Global Politics.

*Turkey's Rise as an Emerging Power* Paul Kubicek, Emel Parlar Dal, H. Tarik Oğuzlu, 2016-04-14. Turkey is emerging as an important actor in world politics, exerting growing influence both in its immediate region and beyond. This book aims to understand and explain this phenomenon utilizing a variety of perspectives from international relations theory. One prominent issue is how Turkey, long embedded in the West via NATO and other European organizations, is growing more confident and is asserting more independent foreign policy positions. This is particularly marked in the Middle East where some suggest Turkey is pursuing a neo-Ottomanist agenda. At times this competes with and creates tensions with the West. However, a rising Turkey can also be a constructive phenomenon and complement the West. This book examines geopolitical, economic, and cultural dimensions of Turkey's rise, pointing to both Turkish success and the limits of Turkish power and influence. It includes consideration of Turkey's relations with NATO, the European Union, the Middle East, and BRIC countries. This book was published as a special issue of *Turkish Studies*.

**The New Geopolitics of Transatlantic Relations** Stefan Fröhlich, 2012-02-28. Ultimately, the book sets forth a new transatlantic agenda by discussing principal areas of concern.

*The New Geopolitics of Eurasia and Turkey's Position* Bülent Aras, 2002. This work explores the geopolitical struggles that are currently underway in the newly independent states of the Caucasus region, showing how many players in the region are coalescing into two opposing blocs. The growing political, military, and economic ties amongst the countries of these two blocs stem from a number of developments in the region, most notably the fall of the Soviet Union and consequently the end of the Cold War and its bi-polar global alliance structure. These blocs are competing for influence in the region and the rights to exploit and transport the rich energy resources that have been found in the Caspian Sea. The text shows how many actors have been willing to co-operate in other non-energy related issues in the

hope of receiving a financial reward when countries do decide on these matters

**The New Geopolitical Realities for Russia** Nursin Atesoglu Güney, 2019-08-27 In the last decade Russia has searched for new alternative policies to compensate for its political deficiencies and to balance its rivals in one of the key areas of the approaching geopolitical rivalry the sea The Russian assertiveness seen in the Black Sea Mediterranean basin has recently been a real concern for the international community In the six chapters of this book contributors explain Moscow s newly perceived assertive foreign and security behavior in the Black Sea and Mediterranean basin from their own perspectives and reach a conclusion about the limits and validity of this new Russian ascendance in the region
