**New Directions in the Australian House** Anna Johnson,2006-01-01 Looks at the development in the design of houses by looking at 25 recent houses by 25 Australian architects **Australia** Harry Margalit,2019-11-15 This book tells the story of the architects and buildings that have defined Australia's architectural culture since the founding of the modern nation through Federation in 1901 That year marked the beginning of a search for better city forms and buildings to accommodate the changing realities of Australian life and to express an emerging distinctive and eventually confident Australian identity While Sydney and Melbourne were the settings for many of the major buildings all states and territories developed architectural traditions based on distinctive histories and climates Harry Margalit explores the flowering of these many architectural variants from the bid to create a model city in Canberra through the stylistic battles that opened a space for modernism to the idealism of postwar reconstruction and beyond to the new millennium Australia reveals a vibrant and influential culture of the built environment at its best when it matches civic idealism with the sensuality of a country of stunning light and landscapes

**New Directions in Contemporary Architecture** Luigi Prestinenza Puglisi,2008-05-05 Rem Koolhaas has defined architecture as a chaotic adventure Nothing could be more true than that of the last two decades Never has architecture been so unbridled and so extraordinary the architectural cast has never been so wide and their works so diverse What though if you are new to the subject How is it possible to make sense of this seemingly unruly architectural landscape There are so many different types of architecture so many designers with such varying and even contradictory approaches This book is a much needed navigation guide for anyone interested in modern architecture Organised chronologically it enables you to find your way through one of the most prolific periods of building design It looks at buildings in often contrasting styles that have been built almost simultaneously

across the world with their roots in very different tendencies and schools of thought A loose but effective framework is provided which pulls all these multiple threads together while key buildings are described individually with a unique clarity and precision Aaron Betsky Director of Cincinnati Art Museum Comprehensive coherent and cogent Puglisi's book sorts out the messy history of the last quarter century of the world's best architecture Professor Iain Borden Head Bartlett School of Architecture UCL Illuminating and insightful a must have read for students Hans Ibelings Editor of A10 new European architecture Lucid and concise Charles Jencks Architecture Critic and Author A compelling comprehensive overview of the avant garde since 1988 as it oscillates in and out of the global star system Bill Menking Editor of The Architect's Newspaper This is the first clear and systematic study of the culture of architecture from the reds of deconstruction to the sustainable greens *Summerson and Hitchcock* Frank E. Salmon, 2006 Publisher description **John Dalton** Elizabeth

Musgrave, 2023-08-10 This book addresses the work of architect John Dalton 1927-2007 an important voice in mid century modernism in Australia whose work despite his being exhibited and published internationally and also winning several awards for his designs is woefully little known Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects the book draws on previously unpublished archival documents including Dalton's drawings and paintings transcripts of lectures letters and articles plans and photographic images of built works to characterize the architect not only as a very talented designer but also as a pioneer of environmentalist thinking in Australia The book reveals how Dalton's architectural preoccupations parallel a transition in mid century modern architecture globally from functional efficiency and material rationalism to a concern with being in dialogue with the environment confirming a wider environmental turn that involved the integration of environmental with cultural considerations through relational thinking and which preceded and transcends the discipline's fascination with theoretical paradigms such as Critical Regionalism John Dalton Subtropical Modernism and the Turn to Environment in Australian Architecture is thus not only an important contribution to the existing scholarship on 20th century modernism but also to the current renewed interest in environmental design across the globe *Sydney Architecture* Paul McGillick, Patrick Bingham-Hall, 2005-02 Sydney Architecture documents the rich architectural tradition of Australia's oldest and largest city

□□□□, 2007 *New Directions 1952-1962* Christine France, 1991 **Contemporary Architects** Muriel Emanuel, 2016-01-23 **Brutalism Resurgent** Julia Gately, Stuart King, 2018-02-02 Brutalism had its origins in b-ton brut concrete in the raw and thus in the post war work of Le Corbusier The British architects Alison and Peter Smithson used the term New Brutalism from 1953 claiming that if their house in Soho had been built it would have been the first exponent of the New Brutalism in England Reyner Banham famously gave the movement a series of characteristics including the clear expression of a building's structure and services and the honest use of materials in their as found condition The Smithsons and Banham promoted the New Brutalism as ethic rather than aesthetic privileging truth to structure materials and services

and the gritty reality of the working classes over the concerns of the bourgeoisie. But Brutalist architecture changed as it was taken up by others giving rise to more sculptural buildings flaunting their raw materials including off form concrete often in conjunction with bold structural members. While Brutalism fell out of vogue in the 1980s recent years have seen renewed admiration for it. This volume is consistent with this broader resurgence presenting new scholarship on Brutalist architects and projects from Skopje to Sydney and from Harvard to Haringey. It will appeal to readers interested in twentieth century architecture and modern and post war heritage. This book was originally published as a special issue of *Fabrications* the Journal of the Society of Architectural Historians Australia and New Zealand.

**Constructing Faith in the Antipodes** Lisa Marie Daunt, 2025-12-10. Over 1 650 churches were built in Queensland Australia between 1945 and 1977. They constitute some of the most notable modern architecture in the state and reveal tensions surrounding modernism's role in cultural expression and regional identity. While much research has focused on post war modern church architecture in the Global North little has been done on the Global South. This book offers a particular perspective on modernist church architecture differing from accounts of buildings in the northern hemisphere as it highlights how church architecture in Queensland was shaped by its very specific time and place a young and developing state covering a vast area of land sparsely populated highly multi denominational and located in the antipodes. Modern architectural developments and emergent religious ideas did not simply transfer to Queensland. Rather architectural ideas were circulated globally allowing for a global narrative. This landmark study seeks to broaden views and methods for future research both locally and internationally. Richly illustrated *Constructing Faith in the Antipodes* combines both a chronological and a thematic approach to narrate modern church architectural history and offers a fascinating glimpse into a distinct collection of modern church buildings.

**Living the Modern** Claudia Perren, Kristien Ring, 2007. Since the nineteen fifties a unique form of modern architecture has been developing in Australia a progressive modernism which involves the dynamic combination of tradition and transformation. This catalogue accompanies the exhibition *Living the Modern* Australian Architecture and analyzes this culture and environment specific architecture using its residential constructions as a basis for examination. The scope of the book extends from detached family houses to high rise buildings. Examples of early design from the post war period are explored in an introductory overview but the focus of the publication is directed towards a diverse mix of twenty five Australian architects. For the last fifteen years they have been applying interpreting or reworking modernist approaches but despite fame in their homeland their outstanding and refreshing productions remain largely unheard of in Europe. Including texts by Richard Blythe Philip Drew Philip Goad Gevork Hartoonian Tom Heneghan Hannah Lewi Elizabeth Musgrave Stephen Neille Claudia Perren Kristien Ring and Peter Wilson. Book jacket.
