obviously concern anyone engaged in the history and culture of the Middle Ages. Regardless of what aspects of the medieval world a scholar is dealing with his or her study has much to gain from a source pluralistic approach in order to be able to understand and even combine different types of sources a scholar must be aware of what methods are relevant and available and how they can be adapted and applied. This collection of essays presents a comprehensive overview of current and fresh approaches to the history of medieval Europe. The topics include among other things the complex relationship between the spoken and the written word, explorations in social and geographic space layers and mental images perceivable in medieval texts, source edition techniques, relics as visual and tangible items, not to mention the possibilities offered by prosopography, zooarchaeology and the natural sciences. Also the question and significance of ethics an ever more important issue in present day academic circles is discussed. The contributors to this volume themselves form a very inter and multidisciplinary team although they can all be labeled as medievalists they in fact work within different disciplines and in several different research units in different countries. Geographically several parts of Europe are covered in the essays not only the westernmost part of the continent but also the poorly known eastern and northern parts as well. This diversity makes the collection worthwhile reading for students and scholars alike.
