

SURVIVING THE NEW ECONOMIC DISORDER

There is no question that America is in the midst of a serious financial crisis—unemployment is up, homes are going into foreclosure, and every day it costs more and more just to get by.

Economist Larry Bates understands the serious problems we face, and in *The New Economic Disorder* he reveals the five powerful, dangerous, and unstoppable forces that are causing it. With clarity and confidence, he turns to the Bible to help us to understand that there is a permanent, lasting solution, addressing such topics as:

- The coming new world order and what it has to do with your finances
- Your financial privacy (hint, you don't have any...)
- How government manipulation has given us an illusion of prosperity
- The debt bubble and what that means for your investments

God does indeed have a plan! Discover how you and your family can survive—and thrive—in these difficult times.

DR. LARRY BATES, an economist and publisher and editor of *Monetary and Economic Review*, is a former member of the Tennessee House of Representatives and chairman of its Committee on Banking and Commerce. Dr. Bates is a former bank CEO and has taught money and banking for the Bank Administration Institute and the state college system in Tennessee. He is an internationally recognized speaker on political systems and the Federal Reserve and how they affect the economy and your finances. Bates is also the CEO of the Information Radio Network and IRN USA Radio News.

Orders of Exclusion Kyle M. Lascurettes,2020 When and why do powerful countries seek to enact major changes to international order the broad set of rules that guide behavior in world politics This question is particularly important today given the Trump administration's clear disregard for the reigning liberal international order in the United States Across the globe there is also uncertainty over what China might seek to replace that order with as it continues to amass power and influence Together these developments mean that what motivates great powers to shape and change order will remain at the forefront of debates over the future of world politics Prior studies have focused on how the origins of international orders have been consensus driven and inclusive By contrast Kyle Lascurettes argues in *Orders of Exclusion* that the propelling motivation for great power order building has typically been exclusionary Dominant powers pursue fundamental changes to order when they perceive a major new threat on the horizon Moreover they do so for the purpose of targeting this perceived threat be it another powerful state or a foreboding ideological movement The goal of order building then is blocking that threatening entity from amassing further influence a motive Lascurettes illustrates at work across more than three hundred years of international history Far from falling outside of the bounds of traditional statecraft order building is the continuation of power politics by other means
