The Rise of Non-Lethal  
Weapons

Malcolm Dando

# New Form Of Warfare The Rise Of Nonlethal Weapons

**F Rizvi**

## **New Form Of Warfare The Rise Of Nonlethal Weapons:**

**A New Form of Warfare** Malcolm Dando, 1996 Today's industrialised powers wish to deploy military forces in peacekeeping operations without incurring or causing casualties But Dando argues that the deployment of non lethal weapons could raise many difficult questions and bring new forms of warfare *Professional Journal of the United States Army*, 1998 Enemy Civilian Casualties Ofer Fridman, 2019-03-13 Civil casualties and collateral damage have been long considered as an undesired outcome of military activity that has to be reduced While most of the contemporary discourse on this topic has been primarily concentrating on three main factors the legal aspects of causing civil casualties the impact of war on local population and different factors of military professionalism required to avoid disproportional harm to civilians this book asks an entirely different question As the subject of civil casualties during military operations seems to be highly politicized this book takes this discourse out of its usual niches and suggests that the indirect responsibility rests with the politicians and the public which they represent When a society in the beginning of the 21st century sends its troops to a battle does it really care about the enemy civilian casualties To answer this question this book traces the political and cultural factors that have led to the failure of Non Lethal Weapons the great promise of the 1990s which was intended to make the war significantly less lethal than it was known before Examining three different cases this study explains that the idea of minimizing civil casualties is no more than an illusion and in fact neither politicians nor societies feel really stressed to change this situation **Quarterly Review of Military Literature**, 1998 *Military Review*, 1998 Nonlethal Weapons Robert J. Bunker, 1997 The purpose of this paper is to promote understanding of and research into a new category of weapons designated nonlethal by the military services These weapons are also classified as less than lethal or less lethal by law enforcement agencies National security experts consider these weapons increasingly important in the post war Cold War era This type of weapon has been used throughout history but was given new emphasis during the Vietnam War era Law enforcement agencies and Army national guard units relying upon traditional forms of politico military force were ineffective in countering US domestic civil unrest As similar types of conflict now many magnitudes greater seem to dominate international politics since the end of the Cold War this type of weapon takes on increasing importance page ix **BMJ**, 1997 *Georgetown Journal of International Law*, 2005 **Disarmament Forum**, 2005 **Journal of the United Service Institution of India** United Service Institution of India, 1998 **The Law of Armed Conflict** Naval War College (U.S.), 1998 *Michigan Journal of International Law*, 2009 **Readings on International Law from the Naval War College Review, 1978-1994** John Norton Moore, Robert F. Turner, 1995 International Law Studies Naval War College (U.S.), 1998 **India's National Security** Rahul K. Bhonsle, 2004 Presents an analysis of asymmetrical challenges to India's national security to include its political social economic and environmental dimensions **Technology and Security** Brian Rappert, 2007-10-11 Taking forward the state of academic understanding where security and technology intersect this title

assesses the challenges posed by scientific and technological developments for security while understanding how perceptions of security threats are themselves formed      **Chemical/biological warfare** ,2003      *Neo-conned!* D. L. O'Huallachain,J. Forrest Sharpe,2005 Asserting the traditional Christian just war doctrine against the neoconservative caricature that masks violence and aggression Includes bibliographical references p 446 447      *War Or Health* Ilkka Taipale,2002 This comprehensive anthology of 70 specially commissioned essays provides an unusually wide ranging examination of the connection between warfare and human health Contributors look at the changing character of wars and their effects on civilization the medical and health aspects of different types of weapons the changing roles of health professionals in war the arms trade social tensions the media theories of violence and war as a social institution      *Armed Conflict in the 21st Century* Steven Metz,2000 Within the past decade the U S military has implemented a number of programs to assess the changes underway in the global security environment and in the nature of warfare Defense leaders and thinkers have concluded that revolutionary change is taking place and if the United States develops appropriate technology warfighting concepts and military organizations it can master or control this change thus augmenting American security Dr Steven Metz suggests that official thinking within the U S military may be too narrow The information revolution he contends will have far reaching strategic effects The transformation it brings will not only be technological but political social ethical and strategic as well As he explores the impact that the information revolution may have on the conduct of armed conflict Dr Metz introduces a number of ideas which need further analysis including the potential for the emergence of nontraditional networked enemies multidimensional asymmetry the privatization of security and the potential impact of technologies like robotics nonlethality and nanotechnology He concludes with an assessment of the features likely to characterize successful militaries in the 21st century

## Reviewing **New Form Of Warfare The Rise Of Nonlethal Weapons**: Unlocking the Spellbinding Force of Linguistics
