Welter,2025-02-11

The battle in architecture between the internationalist voices of modernism and the localized resistance which favored traditional technologies and regional precedents reflected in microcosm the violent and complex histories of twentieth century Germany The chapters in this book span the years from 1902 to 1991 and interrogate the ways in which architecture constructed and reconstructed these histories with a primary focus on those voices that were opposed to the dogmas of modernism All translated into English for the first time the chapters reflect the changing eras and contours of the German nation They were written in the German Empire 1871 1918 the Weimar Republic 1918 1933 the Third Reich 1933 1945 the Federal Republic of Germany and the German Democratic Republic GDR which both existed from 1949 to 1990 and finally the reunified Germany that came into being in 1990 when the former GDR and the reunified Berlin joined the Federal Republic of Germany The chapters in this book were originally published as a special issue of Art in Translation Before the Bauhaus John V. **New German architecture** Peter Murray,1986 *Architecture and the Nazi Cultural Landscape* David H. Haney,2022-09-13 This book traces cultural landscape as the manifestation of the state and national community under the Nazi regime and how the Nazi era produced what could be referred to as a totalitarian cultural landscape For the Nazi regime cultural landscape was indeed a heritage resource but it was much more than that cultural landscape was the nation The project of Nazi racial purification and cultural renewal demanded the physical reshaping and reconceptualization of the existing environment to create the so called new Nazi cultural landscape One of the most important components of this was a set of monumental sites thought to embody blood and soil beliefs through the harmonious synthesis of architecture and landscape This special group of landscape bound architectural complexes was interconnected by the new autobahn highway system itself thought to be a monumental work embedded in nature Behind this intentionally aestheticized view of the nation as cultural landscape lay the all pervasive system of deception and violence that characterized the emerging totalitarian state This is the first historical study to consider the importance of these monumental sites together with the autobahn as evidence of key Nazi cultural and geographic strategies during the pre war years This book concludes by examining racial and nationalistic themes underlying cultural landscape concepts today against this historic background **A Nation Builds** German Library of Information (New York, N.Y.),1940 New Directions in German Architecture Gunther Feuerstein,1969-01
