

New Israeli Architecture

Amiram Harlap

New Israeli Architecture:

New Israeli Architecture Amiram Harlap, 1981-12-31 Singles out some creative works that are representative of the search the experiments and the solutions that underlie Israeli architecture in hopes of providing an acquaintance with this architecture and offering an understanding of the factors that have gone into its making Illustrated **Hollow Land: Israel's Architecture of Occupation** Eyal Weizman, 2012-08-07 Acclaimed exploration of the political space created by Israel's colonial occupation In this journey from the deep subterranean spaces of the West Bank and Gaza to their militarized airspace Eyal Weizman unravels Israel's mechanisms of control and the transformation of the Occupied Territories into an artifice in which all natural and built features function as the instruments of occupation Weizman identifies the ideas behind this phenomenon and traces their development from the influence of archaeology on urban planning Ariel Sharon's reconceptualization of military defense during the 1973 war through the planning and architecture of the settlements to the contemporary Israeli discourse and practice of urban warfare and airborne targeted assassinations In exploring Israel's methods to transform the landscape and the built environment themselves into tools of domination and control Hollow Land lays bare the political system at the heart of this complex and terrifying project of late modern colonial occupation

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopaedia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries **Reinventing Jerusalem** Simone Ricca, 2007-05-25 The Jewish quarter of Jerusalem today seems like an organic fusion of a modern Israeli city with an ancient Jewish heritage However as Simone Ricca details in this fascinating book the aesthetics of the Jewish Quarter were deliberately planned and executed by Israel after it was occupied during the 1967 war Secular nationalist as well as religious politicians agreed that it should be turned in to the capital of the Jewish nation and that it should be excavated and developed in such a way as to create a sense of continuity with the Jewish people's historical claims to the land Zionist ideology was thus translated in to bricks and mortar as modern civic amenities were constructed around historic sites such as the Wailing Wall and the Hurva Synagogue Ricca examines the politics of heritage conservation and shows that the Old City's reconstruction did not so much preserve the past as inscribe an identity on to the future **Handbook of Israel: Major Debates** Eliezer Ben-Rafael, Julius H. Schoeps, Yitzhak Sternberg, Olaf Glöckner, Anne Weberling, 2016-10-24 The Handbook of Israel Major Debates serves as an academic compendium for people interested in major discussions and controversies over Israel It provides innovative updated and informative knowledge on a range of

acute debates Among other topics the handbook discusses post Zionism militarism democracy and religion in equality colonialism today s criticism of Israel Israel Diaspora relations and peace programs Outstanding scholars face each other with unadulterated divergent analyses These historical political and sociological texts from Israel and elsewhere make up a major reference book within academia and outside academia About seventy contributions grouped in thirteen thematic sections present controversial and provocative approaches refl ecting from different angles on the present day challenges of the State of Israel Other Major Works by the Editors Eliezer Ben Rafael Is Israel One Religion Nationalism and Ethnicity Confounded Brill 2005 Ethnicity Religion and Class in Israel Cambridge University Press paperback 2007 Julius H Schoeps Begegnungen Menschen die meinen Lebensweg kreuzten Suhrkamp 2016 Pioneers of Zionism Hess Pinsker R lf Messianism Settlement Policy and the Israeli Palestinian Conflict De Gruyter 2013 Yitshak Sternberg World Religions and Multiculturalism A Relational Dialectic Brill 2010 Transnationalism Brill 2009 Olaf Gl ckner Being Jewish in 21st Century Germany De Gruyter 2015 with Haim Fireberg Deutschland die Juden und der Staat Israel Olms 2016 with Julius H Schoeps

Architecture and Building ,1923 **Israel and Africa** Haim Yacobi,2015-07-03 Israel and Africa critically examines the ways in which Africa as a geopolitical entity is socially manufactured collectively imagined but also culturally denied in Israeli politics Its unique exploration of moral geography and its comprehensive interdisciplinary research on the two countries offers new perspectives on Israeli history and society Through a genealogical investigation of the relationships between Israel and Africa this book sheds light on the processes of nationalism development and modernization exploring Africa s role as an instrument in the constant re shaping of Zionism Through looking at Israel in Africa as well as Africa in Israel it provides insightful analysis on the demarcation of Israel s ethnic boundaries and identity formation as well as proposing the different practices from architectural influences to the arms trade that have formed the geopolitical concept of Africa It is through these practices that Israel reproduces its internal racial and ethnic boundaries and spaces contributing to its geographical imagination as detached not solely from the Middle East but also from its African connections This book would be of interest to students and scholars of Middle East and Jewish Studies as well as Post colonial Studies Geography and Architectural History **A Critical Analysis of Israeli Architecture, 1948-1967** Cindy Marriott,1968 **Modern Architecture and Gender in Pre-State Israel** Sigal Davidi,2025-09-28 This book is a historical and cultural study of the work of the Jewish women architects who flourished in Palestine under the British Mandate 1920 1948 This comprehensive study adds a new chapter to the story of women in architecture in the twentieth century demonstrating how women architects made a key contribution to the design of the emergent Israeli built environment Through in depth historical documentation based on newly discovered archival material Sigal Davidi analyzes the influence of European modernism on the design of institutions for the welfare of women and children These were developed by Zionist women s organizations that drew inspiration from the idea of the New Woman This book offers a multidisciplinary perspective on the study of gender

architecture and the Jewish society in pre State Israel It provides a fresh look at this period based on new research and is intended for academics as well as for a general audience **Modern Architecture in Israel** Michael Levin, 2001-07-03

Until now only partial studies and monographs have traced the history of Israeli architecture and no one has ever attempted a unitary interpretation of such a complex cultural and political phenomenon The troubled history of this land has moved parallel with the evolution of autonomous creative experiences and at the same time strongly linked to the roots of the intellectuals and architects who immigrated there a laboratory sensitive to the international debate and at the same time a window opened onto Middle Eastern culture and its stimuli The unique feature of the Israeli phenomenon lies in the creative contribution offered by a wide variety of artists from faraway contexts and the image of the cities reflects this conditions with design input ranging from Mendelsohn to Harrison from Philip Johnson to Louis Kahn Fredrick Kiesler Oskar Niemeyer and Mario Botta This volume written by one of the greatest experts on modern Israeli art and architecture chronologically follows the most significant phases positioning them critically and offering a detailed interpretation of some of the most significant works from the colonial architecture of the early 1900s to the foundation of Tel Aviv in the twenties and the experiment with white cities under the Bauhaus influence to the postwar brutalist and international phase that would decline in the late sixties in a period of more autonomous elaboration in which city architecture restoration and territorial design acquired greater importance under the influence of a new generation of Israeli designers from Moshe Safdie to Zvi Ecker The book is introduced by two essays by Teddy Kollek and Alexander Tzonis **Building the Cold War** Annabel Jane Wharton, 2001

In postwar Europe and the Middle East Hilton hotels were quite literally little Americas For American businessmen and tourists a Hilton Hotel with the comfortable familiarity of an English speaking staff a restaurant that served cheeseburgers and milkshakes trans Atlantic telephone lines and most important air conditioned modernity offered a respite from the disturbingly alien For impoverished local populations these same features lent the Hilton a utopian aura The Hilton was a space of luxury and desire a space that realized permanently and prominently the new and powerful presence of the United States Building the Cold War examines the architectural means by which the Hilton was written into the urban topographies of the major cities of Europe and the Middle East as an effective representation of the United States Between 1953 and 1966 Hilton International built sixteen luxury hotels abroad Often the Hilton was the first significant modern structure in the host city as well as its finest hotel The Hiltons introduced a striking visual contrast to the traditional architectural forms of such cities as Istanbul Cairo Athens and Jerusalem where the impact of its new architecture was amplified by the hotel's unprecedented siting and scale Even in cities familiar with the Modern the new Hilton often dominated the urban landscape with its height changing the look of the city The London Hilton on Park Lane for example was the first structure in London that was higher than St Paul's cathedral In his autobiography Conrad N Hilton claimed that these hotels were constructed for profit and for political impact an integral part of my dream was to show the countries most exposed to Communism the other

side of the coin the fruits of the free world Exploring everything the carefully drafted contracts for the buildings to the remarkable visual and social impact on their host cities Wharton offers a theoretically sophisticated critique of one of the Cold War's first international businesses and demonstrates that the Hilton's role in the struggle against Communism was as Conrad Hilton declared significant though in ways that he could not have imagined Many of these postwar Hiltons still flourish Those who stay in them will learn a great deal about their experience from this new assessment of hotel space

Architecture, 1908 *Hollow Land* Eyal Weizman, 2024-10-01 How does Israel extend its control over Palestinian lands From the tunnels of Gaza to the militarized airspace of the Occupied Territories Eyal Weizman unravels the mechanisms of control and how they have transformed Gaza and the West Bank into a war zone This is essential reading for understanding how architecture and infrastructure are used as lethal weapons in the formation of Israel In this new edition Weizman explains how the events following the invasion of Gaza in October 2023 bear witness to the continuing policies of oppression He details how this book became a foundational text for Forensic Architecture Contemporary Architects Ann Lee Morgan, Colin Naylor, 1987 To strengthen the contemporary focus of this volume we have added about forty architects and have deleted some whose activity ceased before World War II In making these decisions we have been assisted by an Advisory Board As in the first volume we have continued to define the word architect very broadly so as to include planners theorists structural engineers and landscape architects whose work seems to be central to the enterprise of creating habitable spaces in our day Editor's note **From Frugality to Exuberance** Daphna Half, 2017 This dissertation argues for the emergence of a new materiality in Israeli architecture in the 1950s 60s and 70s It examines these decades in an extended historical time frame beginning with the British Mandate for Palestine Materiality refers to local Israeli socioeconomic and geopolitical conditions It also reflects the literal use handling and finishing of materials in architecture During this period first and second stages are described The first was shaped by objective circumstances in which architecture operated in response to scarcity and demonstrated a realist attitude one also embedded in the concept of asceticism It was manifest in restrained formal gestures abstention from material extravagance the use of local materials and an appeal to rational building procedures The second stage emerging in the 60s had a different syntax The analytical skeletal frame constructions of the 50s turned synthetic monolithic and earth bound Compositions turned sculptural and exuberant An appeal to the architect's expressive ingenuity became a recognized design objective The issue of banality versus extraordinariness in design surfaced at this point My analysis of materiality is based on the following disciplinary themes typology public space craft and topography These were dimensions of a broader search for a situated architecture undertaken by Israeli architects since the 1930s in which they sought to localize the importation of modern architecture from Europe Typology offered an opportunity to synthesize modern building practices with vernacular models It revealed the reciprocal interchange between cultures Architects and planners perceived public space as a means to consolidate new communities and represent the

collective ethos of the new nation Public space regained its value as a structural constituent in built fabrics Building craft and use of local materials made architecture place specific of its time Topographical awareness and the mutual inscription between building and setting represented an ongoing desire to overcome the lack of an unmediated connection between the immigrants and their old new territorial home These disciplinary themes address a variety of scales from detail building neighborhood city and region They demonstrate how Israeli architects adjusted the modernist appeal to abstraction and universalism with a perceptive recognition of their concrete reality

Pacific Coast Architect ,1926 **American Architect and Architecture** ,1892 *Artbibliographies Modern* ,1984 **The American Architect and Building News** ,1881 **Jewish Architecture** Katrin Kessler,Alexander von Kienlin,2015 This volume presents a wide range of articles dealing with the various aspects of Jewish architecture throughout the centuries and its interaction with literature politics etc Scholars from Europe Israel and America presented their current research on Jewish architecture at the international conference Jewish Architecture New Sources and Approaches at the Technische Universit t Braunschweig in April 2014 The conference marked the twentieth anniversary of the fruitful German Israeli cooperation of the Bet Tfila Research Unit for Jewish Architecture in Europe

Unveiling the Magic of Words: A Overview of "**New Israeli Architecture**"

In a global defined by information and interconnectivity, the enchanting power of words has acquired unparalleled significance. Their capability to kindle emotions, provoke contemplation, and ignite transformative change is truly awe-inspiring.
