New Deal In The Urban South:

The Making of Urban America Raymond A. Mohl, Roger Biles, 2023-10-03 The revised and updated third edition of *The Making of Urban America* includes seven new articles and a richly detailed historiographical essay that discusses the vast urban history literature added to the canon since the publication of the second edition. The authors extensively revised introductions and the fifteen reprinted articles trace urban development from the preindustrial city to the twentieth century city. With emphasis on the social, economic, political, commercial, and cultural aspects of urban history, these essays illustrate the growth and change that created modern day urban life. Dynamic topics such as technology, immigration, and ethnicity, suburbanization, sunbelt cities, urban political history, and planning and housing are examined. *The Making of Urban America* is the only reader available that covers all of U.S. urban history and that also includes the most recent interpretive scholarship on the subject.

Urban Policy in Twentieth-century America Arnold Richard Hirsch, Raymond A. Mohl, 1993 The recent riots in Los Angeles brought the urban crisis back to the center of public policy debates in Washington D.C. and in urban areas throughout the United States. The contributors to this volume examine the major policy issues: race, housing, transportation, poverty, the changing environment, the effects of the global economy, confronting contemporary American cities. Raymond A. Mohl begins with an extended discussion of the origins, evolution, and current state of Federal involvement in urban centers. Michael B. Katz follows with an insightful look at poverty in turn of the century New York and the attempts to ameliorate the desperate plight of the poor during this period of rapid economic growth. Arnold R. Hirsch, Mohl, and David R. Goldfield then pursue different facets of the racial dilemma confronting American cities. Hirsch discusses historical dimensions of residential segregation and public policy, while Mohl uses Overtown, Miami, as a case study of the social impact of the construction of interstate highways in urban communities. David Goldfield explores the political ramifications and incongruities of contemporary urban race relations. Finally, Carl Abbott and Sam Bass Warner Jr. examine the impact of global economic developments and the environmental implications of past policy choices. Collectively, the authors show us where we have been, some of the needs that must be addressed, and the urban policy alternatives we face.

VOLUME 1 Colonial Beginnings through Revolution, 1500-1783. Volume Editor: Andrew Robertson, Herbert H. Lehman College. The colonial period witnessed the transformation of thirteen distinct colonies into an independent federated republic. This volume discusses the diversity of the colonial political experience, a diversity that modern scholars have found defies easy synthesis, as well as the long-term conflicts, policies, and events that led to revolution and the ideas underlying independence.

VOLUME 2 The Early Republic, 1784-1840. Volume Editor: Michael A. Morrison, Purdue University. No period in the history of the United States was more critical to the foundation and shaping of American politics than the early American republic. This volume discusses the era of Confederation, the shaping of the U.S. Constitution, and the development of the party system.

Farming the Cutover Robert J. Gough, 1997. *Farming the Cutover* describes the visions and accomplishments of these settlers from their perspective. People of the cutover managed to forge lives relatively independent of market pressures, and for this they were characterized as backward by outsiders, and their part of the state was seen as a hideout for organized crime figures. State and federal planners, county agents, and agriculture professors eventually determined that the cutover could be engineered by professional and academic expertise into a Progressive social model, and the lives of its inhabitants improved. By 1940 they had begun to implement public policies that discouraged farming, and they eventually decided that the region should be depopulated and the forests replanted. By exploring the history of an eighteen-county region, Robert Gough illustrates the travails of farming in marginal areas. He juxtaposes the social history of the farmers with the opinions and programs of the experts who sought to improve the region. Significantly, what occurred in the Wisconsin cutover anticipated the sweeping changes that transformed American agriculture after World War II.

The Church and the Urban Racial Crisis Mathew H. Ahmann, Margaret Roach, 1967. *Descendants of John Moore (Revolutionary War Soldier) and Mary Keller Moore*. Mack Arthur Moore, 1995. Guide to Departments of History, 1978. *The Urban Nation, 1920-1960*. George Edwin Mowry, 1967. Revitalizing Urban Neighborhoods. William Dennis Keating, Norman Krumholz, Philip Star, 1996. Since the 1950s and the advance of urban renewal, local governments and urban policy have focused heavily on the central business district. However, such development has all but ignored the inner-city neighborhoods that continue to struggle in the

shadows of high rise America This analysis of urban neighborhoods in the United States from 1960 to 1995 presents fifteen essays by scholars of urban planning and development Together they show how urban neighborhoods can and must be preserved as economic cultural and political centers
