New Humanists Science At The Edge:

The New Humanists John Brockman, 2003 Collects essays by a variety of top scientists discussing the unique contributions each of them are making to the development of modern thought in an anthology that seeks to forge links between science and the humanities

Science at the Edge John Brockman, 2004 Who are the cutting edge thinkers of today John Brockman argues that scientists through their research and writing are creating a third culture that recalls the Renaissance ideal of a single intellectual whole Combining this holistic awareness of the humanities and science these are the men and women shaping modern thought The result of conversations with twenty two of today's top intellectuals the book includes contributions from Jared Diamond on population theory Steven Pinker on human nature Martin Rees on the future of the universe **SCIENCE AT THE EDGE** introduces us to the best scientific minds of the 21st century giving insight and debate into how best to take humanity forward

The Humanist Imperative in South Africa John W. De Gruchy, 2011-08-01 This book is an outcome of the conversation that occurred during the five days of intense discussion at two symposia initiated by the New Humanism Project The struggle for a more humane society is both local and universal and increasingly these are connected in our time So while the conversation focused specifically on South Africa the discussion was neither parochial nor insular in its scope and character Hopefully then people beyond South Africa will find the contents of this book of value for them in terms of their own contexts

The Return of Collective Intelligence Dery Dyer, 2020-01-07 Reveals how we can each reconnect to collective intelligence and return our world to wholeness balance and sanity Explains how collective intelligence manifests in flocks of birds instantaneous knowing in indigenous peoples and the power of sacred places Offers ways for us to reconnect to the infinite source of wisdom that fuels collective intelligence and underscores the importance of ceremony pilgrimage and initiation Draws on recent findings in New Paradigm science traditional teachings from indigenous groups from North South and Central America and Siberia as well as sacred geometry deep ecology and expanded states of consciousness For our ancestors collective intelligence was a normal part of life We see it today as the mysterious force that enables flocks of birds swarms of bees and schools of fish to function together in perfect synchrony communicating and cooperating at some undetectable level At its most subtle it's an instantaneous knowing shared by members of a group of the wisest course of action that will benefit all As Dery Dyer reveals collective intelligence still resides within each of us and it is the key to restoring balance and harmony to our world She shows how it occurs spontaneously when individuals who share a need and a purpose instinctively self organize into a group and function with no leader or central authority Such groups exhibit abilities much greater than what any of their members possess individually or what can be replicated with artificial intelligence Dyer explains due to an unquestioning dependence on technology modern humanity has forgotten how to connect with collective intelligence and fallen into collective stupidity otherwise known as mob mind or groupthink which is now endangering the interconnected web of life on Earth Drawing on recent findings in New Paradigm

science traditional teachings from indigenous groups as well as sacred geometry deep ecology and expanded states of consciousness the author shows how the ability to think and act collectively for the highest good is hardwired in all living beings She explains how to release ourselves from enslavement by technology and use it more wisely toward the betterment of all life Underscoring the vital importance of ceremony pilgrimage and initiation she offers ways for us to reconnect to the infinite source of wisdom that fuels collective intelligence and which manifests everywhere in the natural world Revealing that once we relearn how to hear the Earth we can heal the Earth Dyer shows how each of us has a vital role to play in restoring our world to wholeness

Thinking of Questions Peter Limm, 2015-09-23 This is not a conventional book It is designed to stimulate and challenge all people who are curious to find out about the world they inhabit and their place within it It does this by suggesting questions and lines of questioning on a wide range of topics The book does not provide answers or model arguments but prompts people to create their own questions and a reading log or journal To this end almost all questions have a list of books or articles to provide a starter for stimulating further reading Once you start you will be hooked Never stop questioning

Feminism, Law, and Religion Marie Failinger, Elizabeth Schiltz, Susan J. Stabile, 2016-04-15 With contributions from some of the most prominent voices writing on gender law and religion today this book illuminates some of the conflicts at the intersection of feminism theology and law It examines a range of themes from the viewpoint of identifiable traditions such as Judaism Christianity Islam and Buddhism from a theoretical and practical perspective Among the themes discussed are the cross over between religious and secular values and assumptions in the search for a just jurisprudence for women the application of theological insights from religious traditions to legal issues at the core of feminist work feminist legal readings of scriptural texts on women's rights and the place that religious law has assigned to women in ecclesiastic life Feminists of faith face challenges from many sides patriarchal remnants in their own tradition dismissal of their faith commitments by secular feminists and balancing the conflicting loyalties of their lives The book will be essential reading for legal and religious academics and students working in the area of gender and law or law and religion

Science at the Edge John Brockman, 2008 As founder editor and publisher of the intellectual forum www.edge.org John Brockman is well positioned to initiate and cultivate an ongoing dialogue with today's leading cutting edge thinkers The website is a virtual salon for every type of intellectual and scientific pursuit from evolutionary biology and quantum physics to crowd psychology and miniaturized computing Through this vibrant and varied online community Brockman has shifted sharply away from the stereotype of the introverted out of touch scientist and introduced the reality of a fully aware and involved scientific society Science at the Edge reflects this brave new world and Brockman has assembled some of the today's most revolutionary scholars from all scientific disciplines to discuss their unique contributions to the development of modern thought Far from being a catalog of the marginal disputes of a quarrelsome scientific class this is a thrilling and intellectually stimulating discussion that serves as an introduction to some of the best minds of the 21st century

This revised and updated version features additional conversations as well as a new introduction written especially for this edition. The book contains Brockman's discussions with many bestselling authors on the following topics: Population theory with Pulitzer Prize winning author Jared Diamond; Human nature with Steven Pinker, author of *The Stuff Of Thought*; Technology and the human mind with Ray Kurzweil, author of the controversial book *The Age of Spiritual Machines*; Ways for humans to make themselves more intelligent with Marvin Minsky, author of *The Emotion Machine*; Evolution of mankind's violence with Richard Wrangham, co-author of *Demonic Males*; Apes and the Origins of Human Violence; Possibilities of robot life with Rodney Brooks, author of *Flesh and Machines*; How Robots Will Change Us; Cognitive science and brain development with Marc Hauser, author of *The Evolution of Communication*; String theory and dimensions of space with Lisa Randall, Harvard physics professor. A selection of the Scientific American Book Club.

Science, Democracy, and the American University Andrew Jewett, 2012-10-29 A reinterpretation of the secularization of American culture focusing on the political views of natural and social scientists from the late nineteenth and early twentieth centuries.

Spiritually Oriented Social Work Practice David S. Derezotes, 2006 This book equips social workers with a practical theoretical framework for spiritually oriented micro and macro level practice with traditional social work populations and problems. Case studies in every chapter illustrate the methods described so students can immediately apply practical examples to their work. Study questions in each chapter ask students to explore their professional and spiritual self in an effort to help them discover and develop their own conscious use of spiritual self which is essential to their effectiveness in practice.

Introduction to Public Librarianship Kathleen de la Peña McCook, 2004 Practitioners and students will find much of value in this essential source for learning about the successful management and functioning of public libraries today.

When We Were Kids John Brockman, 2004 *When We Were Kids* is a book of original essays by celebrated third culture thinkers, scientists who through their work and writing are taking the place of the traditional intellectual in rendering visible the deeper meanings of our lives, redefining who and what we are. The authors, all of whom are world class scientists, are also well known as authors of books for the general public. The subject and starting point for these 27 essays is the subtitle of the book, but while the narratives focus on early influences and experiences, the essays are informed by the same kind of intelligent scientific thinking and writing for which the contributors are renowned. They include Paul Davies *The Cosmic Blueprint*, Richard Dawkins *A Devil's Chaplain*, Daniel C. Dennett *Freedom Evolves*, Freeman Dyson *Disturbing the Universe*, Murray Gell-Mann *The Quark and the Jaguar*, Marc D. Hauser *Wild Minds*, Nicholas Humphrey *Conscious Regained*, Lynn Margulis *Acquiring Genomes*, Marvin Minsky *The Society of Mind*, Steven Pinker *The Blank State*, V. S. Ramachandran *Phantoms in the Brain*, co-author Martin Rees *Our Final Hour*, Robert M. Sapolsky *A Primate's Memoir*, Lee Smolin *Three Roads to Quantum Gravity*.
