Parallel Evolution of Parallel Processors G. Lerman, L. Rudolph, 2013-03-07 Study the past if you would divine the future CONFUCIUS A well written organized and concise survey is an important tool in any newly emerging field of study This present text is the first of a new series that has been established to promote the publications of such survey books A survey serves several needs Virtually every new research area has its roots in several diverse areas and many of the initial fundamental results are dispersed across a wide range of journals books and conferences in many different sub fields A good survey should bring together these results But just a collection of articles is not enough Since terminology and notation take many years to become standardized it is often difficult to master the early papers In addition when a new research field has its foundations outside of computer science all the papers may be difficult to read Each field has its own view of elegance and its own method of presenting results A good survey overcomes such difficulties by presenting results in a notation and terminology that is familiar to most computer scientists A good survey can give a feel for the whole field It helps identify trends both successful and unsuccessful and it should point new researchers in the right direction **Parallel**
